International Management 7th Edition:

International Management Manfred Fuchs, 2022-10-26 This textbook for students and practitioners offers answers to the most important questions and challenges of international management. The main topics are presented and discussed on three levels: a) the macroeconomic and institutional environment of the global economy, b) the international firms embedded as players in this environment, and c) the actual management decisions. The focus is placed both on the characteristics of the individual subject areas (macro, meso, and micro) and on the interdependent connections between these areas. The main interest of this book lies in an application-oriented analysis of the central strategic management decisions in internationalizing companies. This textbook has been recommended and developed for university courses in Germany, Austria, and Switzerland.

Strategic International Management Dirk Morschett, Hanna Schramm-Klein, Joachim Zentes, 2015-01-27 A compact overview of the most relevant concepts and developments in International Management. The various strategy concepts of internationally active companies and their implementation in practice are the core of this book. The authors describe the particularities of international value chain activities and management functions and offer a thorough understanding of how Production, Sourcing, Research & Development, Marketing, Human Resource Management, and Controlling have to be designed in an international company and what models are available to understand those activities in an international context. In 23 lessons, a comprehensive overview of all key issues is given. Each lesson is accompanied by a case study from an international company to facilitate the understanding of all important factors involved in strategic international management. In this third edition, all chapters have been updated, all case studies revised, new chapters, and recent data were integrated.

International Management in Service Firms Dirk Klimkeit, Pengji Wang, Huiping Zhang, 2024-05-22 This textbook examines how service firms manage their international operations. For the first time, it brings together insights from the fragmented literature on this subject into an accessible textbook. Further, it is unique in its focus on service firms' internationalization and international management. Beginning with an overview of the international environment in which service firms operate, it subsequently describes multinational service firms and their internationalization processes, strategies, and organization. Unlike most texts on international services, the book goes beyond internationalization to address the ongoing management of service firms. It not only addresses functions such as global service marketing, financial management, and human resource management but also discusses aspects such as global account management, global service delivery, and international project management, as well as the topical issue of managing distributed virtual teams. A dedicated chapter focuses on offshore shared services and business process outsourcing. These chapters are complemented by a discussion on international corporate governance and corporate social responsibility. The book is intended for students preparing for international careers in the service sector. Each chapter includes case studies, illustrations, highlighted definitions, a chapter summary, and exercises.

International Management Jonathan P. Doh, Fred Luthans, 2023 The global business environment in recent years has been characterized by substantial and often unforeseen change By some accounts the degree of uncertainty and volatility in global political and economic affairs has increased as several long term trends have come to a halt or in some cases reversed Political conflicts economic disruptions and realignment of security arrangements have all created challenges for global business Around the world support for global economic integration and engagement appears to be on the decline The vote by the United Kingdom to separate from the European Union and the withdrawal of the United States from the Trans Pacific Partnership a proposed trade agreement among 12 Pacific facing nations are two stark examples of this broad trend Some see the United States as retreating from its long held position as the leading advocate of trade and economic interdependence Further trade tensions have risen not just between the U S and China two world powers jockeying for global leadership but also between the U S and its key allies such as the European Union and Canada Concurrently nationalist sentiments in the United States Europe Asia and elsewhere have resulted in raised barriers to both legal and illegal immigration Exacerbating these pressures longstanding concerns about the uneven impacts of globalization on jobs wages and incomes have resurfaced as have broader questions about the costs of economic globalization to both developed and developing countries and their citizens
