**Rethinking Environmental Law** Laitos, Jan G.,2021-08-27 Challenging historic assumptions about human relationships with nature Jan G Laitos examines how environmental laws have addressed environmental problems in the past and the reasons for the laws inability to successfully prevent environmental contamination and alterations of critical environmental systems This forward thinking book offers a creative and organic alternative to traditional but ultimately unsuccessful environmental rules It explains the need for a new generation of environmental laws grounded in the universal laws of nature which might succeed where past and current approaches have largely failed

**IUTAM Symposium on Laminar-Turbulent Transition and Finite Amplitude Solutions** Tom Mullin,R. R. Kerswell,2005-09-19 An exciting new direction in hydrodynamic stability theory and the transition to turbulence is concerned with the role of disconnected states or finite amplitude solutions in the evolution of disorder in fluid flows This volume contains refereed papers presented at the IUTAM LMS sponsored symposium on Non Uniqueness of Solutions to the Navier Stokes equations and their Connection with Laminar Turbulent Transition held in Bristol 2004 Theoreticians and experimentalists gathered to discuss developments in understanding both the onset and collapse of disordered motion in shear flows such as those found in pipes and channels The central objective of the symposium was to discuss the increasing amount of experimental and numerical evidence for finite amplitude solutions to the Navier Stokes equations and to set the work into a modern theoretical context The participants included many of the leading authorities in the subject and this volume captures much of the flavour of the resulting stimulating and lively discussions

**Differential Equations: From Calculus to Dynamical Systems** Virginia W.
