*Basic Logistics and Shipping Solution* Dr. Subodh Sachan, Prof. Dr. Punit Goel, Niharika Singh, Dr. K Yogesh, 2026-03-08

Logistics and shipping form the invisible backbone of modern commerce. From the movement of raw materials to factories to the delivery of finished products to consumers across cities and countries, efficient logistics systems enable trade, economic growth, and everyday convenience. In an increasingly interconnected and digitally driven world, understanding the fundamentals of logistics and shipping has become essential not only for professionals but also for students, entrepreneurs, and policymakers. The book *Basic Logistics and Shipping Solutions* is designed to provide a clear, structured, and practical introduction to the core concepts of logistics and shipping. It aims to bridge the gap between theory and real-world practice by explaining complex ideas in simple language, supported by examples and case illustrations. The content has been carefully organized to suit diploma-level learners, undergraduate and postgraduate students, as well as entry-level professionals seeking foundational knowledge of logistics operations. This book covers a wide range of topics, including transportation modes, warehousing, inventory management, packaging, and cargo safety, shipping documentation, cost management, and the role of technology in modern logistics. It also explores emerging trends such as sustainable logistics, e-commerce distribution, and digital transformation, reflecting the evolving nature of the industry. Each chapter is structured to build progressively, enabling readers to develop a comprehensive understanding of logistics systems and their practical applications. A key objective of this book is to promote analytical thinking and operational awareness. By highlighting real-world challenges and industry practices, the book encourages readers to view logistics not merely as a support function but as a strategic driver of efficiency, competitiveness, and customer satisfaction. Emphasis is placed on responsible and sustainable logistics practices, recognizing their growing importance in global trade and environmental stewardship.

[Global Partnerships and Governance of Supply Chain Systems](#) Channaganu, Paramaiah, Yanamandra, Ramakrishna, 2025-02-03

Global supply chains are essential for building sustainable economies and achieving many UN Sustainable Development Goals (SDGs). They promote transparency, reduce inequalities, and strengthen developing economies. Supply chains help balance production and consumption, reduce uncertainties, and support inclusive growth in sectors like healthcare. Due to their complexity and evolving nature, strong infrastructure and integrated processes are necessary. This integration is key to advancing a circular and sustainable global economy. *Global Partnerships and Governance of Supply Chain Systems* fills the existing gap in the body of knowledge in the field of supply chain management and global economy. It impacts all the stakeholders involved in developing supply chains and policies related to the global economy by enabling them to redesign their current strategies and by providing them with the latest successful models. Covering topics such as risk management,
