New Directions in Forensic Psychology: Applying Neuropsychology, Biomarkers and Technology in

Assessment & Intervention Joan E. Van Horn, Josanne van Dongen, Yvonne H. A. Bouman, Märta Wallinius, Patrice Renaud, 2024-10-23 New trends in research assessment and treatment are currently visible in the forensic field in three relatively separate areas the use of neuropsychology biomarkers and wearables and VR technology in forensic mental health. These areas individually can make a valuable contribution to improving forensic assessments and treatment but combined they might even have a greater impact. For example heart rate variability a biomarker can be visualized during Virtual Reality VR scenarios to increase patients insights into their physiological responses. With our topic New Directions in Forensic Psychology Applying Neuropsychology Biomarkers and Technology in Assessment and Intervention we hope to offer more insight into the state of scientific developments in the aforementioned areas as they relate to forensic psychology. As a result we hope to be able to pinpoint lacking knowledge and offer suggestions for further research. **Global Advances in the**
