Applied Cross-Cultural Data Analysis for Social Work Thanh V. Tran, Keith T. Chan, 2021 Applied Cross Cultural Data Analysis for Social Work offers practical guides for data analysis in cross cultural research It shows how social workers can employ commonly used statistical approaches to make meaningful comparisons in health mental health social and psychological phenomena across cultural groups The book can also be used as a textbook for advanced research course in social work and allied fields and would benefit graduate students faculty and researchers

Domination and Subjugation in Everyday Life Lonnie Athens, 2015-10-26 Reputable scholars have long charged that symbolic interactionism which is based on the principle of sociality discounts the importance that subordination plays in human groups Emphasizing dominance and power Athens explains how subordination operates in human group life from a new interactionist s perspective aptly dubbed by him radical interactionism Expanding on the work of sociologist Robert E Park Athens explains the nature and operation of super ordination and subordination which he believes affects all social interaction between human beings and groups He then develops a generic framework and a common terminology to help explain all forms of social conflicts Athens argues that a radical interactionism disentangles the nature of domination power and force as well as the relationship among them in a manner consistent with the basic premises of the Chicago school of pragmatism This book offers a provocative and intelligent outline of the development and evolution of radical interactionism a perspective interactionists can add to their toolbox with profit

Lees' Loss Prevention in the Process Industries Frank Lees, 2005-01-25 Over the last three decades the process industries have

grown very rapidly with corresponding increases in the quantities of hazardous materials in process storage or transport. Plants have become larger and are often situated in or close to densely populated areas. Increased hazard of loss of life or property is continually highlighted with incidents such as Flixborough, Bhopal, Chernobyl, Three Mile Island, the Phillips 66 incident, and Piper Alpha, to name but a few. The field of Loss Prevention is and continues to be of supreme importance to countless companies, municipalities, and governments around the world because of the trend for processing plants to become larger and often be situated in or close to densely populated areas, thus increasing the hazard of loss of life or property. This book is a detailed guidebook to defending against these and many other hazards. It could, without exaggeration, be referred to as the bible for the process industries. This is THE standard reference work for chemical and process engineering safety professionals. For years it has been the most complete collection of information on the theory, practice, design, elements, equipment, regulations, and laws covering the field of process safety. An entire library of alternative books and cross-referencing systems would be needed to replace or improve upon it, but everything of importance to safety professionals, engineers, and managers can be found in this all-encompassing reference. Instead, Frank Lees' world-renowned work has been fully revised and expanded by a team of leading chemical and process engineers working under the guidance of one of the world's chief experts in this field, Sam Mannan, is professor of chemical engineering at Texas A&M University. Principles, practice, codes, standards, data, and references needed by those practicing in the field.

This new edition gives students valuable practice in reading and evaluating research. All major methods of research are illustrated, including qualitative research, content analysis, survey research, observational research, experimental research, and program evaluation. The articles deal with contemporary topics that will hold your students' attention. The lines in each article are sequentially numbered. This allows easy reference to specific parts of the articles during classroom discussions. Factual Questions at the end of each article encourage students to read for methodological and substantive points. The Answer Key provides answers to the Factual Questions. The line numbers where the answers can be found are included, making the key easy to use. The Questions for Discussion at the end of each article address broad issues of research design and overall research quality. Ideal for homework assignments followed by classroom discussions at the next class meeting.
