

Introduction

The exercises were thoroughly field tested with students at both the undergraduate and graduate levels. In the field tests, the following procedure was used for each exercise:

1. The Statistical Guide at the beginning of an exercise was read aloud, and students were encouraged to ask questions. (Note that the guides are not meant to replace a traditional statistics textbook; they are merely reminders of important concepts that students will need while attempting an exercise.)
2. The narrative part of the excerpt (not the tables) was read aloud by a student. For longer excerpts, one student was asked to read the first half and another student was asked to read the second half.
3. The instructor discussed the first question or two with the class.
4. Students were then asked to place themselves in groups of three or four to help each other with the remaining questions. Most groups engaged in considerable discussion while answering the questions.
5. While the groups were answering the questions, the instructor circulated from group to group to answer students' questions. Sometimes the instructor suggested that a group that was having trouble with a question consult another group that had already answered it successfully.

Note: Occasionally, a student or two in a class would not join a group, preferring to work alone. Usually, these were highly skilled students who could quickly answer the questions. You can encourage students of this sort to participate in groups (and help slower students) by doing one of the following: (a) make it a class requirement to participate in groups, (b) give points toward the final grade for participation in groups, or (c) circulate and provide help only to groups—not to individuals working alone. If you do the latter, explain that you do not have time to talk with individual students. On the other hand, you might also consider allowing advanced students to complete the exercises alone, check their answers with you, and then circulate and assist other students.

New exercises to the Sixth Edition are indicated by asterisks in the Contents of the book.

Answers for the Sixth Edition

EXERCISE 1: 1. 9.4%. 2. 6.1%. 3. Marijuana. 4. 54.7%. 5. 20. 6. 171. 7. 17. 8. 100%. 9. While answers may vary, it makes sense if each participant were allowed to name more than one substance. 10. While answers may vary, it would be risky to generalize the results from this specialized sample to the general population. 11. Answers may vary.

EXERCISE 2: 1. Grade seven. 2. 259. 3. More sixth graders. 4. Binged in the past year. 5. 6. 6. 42.3%. 7. 36. 8. 129. 9. Students in the non-NSSI group. 10. While answers may vary, it makes sense if each participant were allowed to name more than one health-risk behavior. 11. While answers may vary, it is not surprising that someone who admits to purposely self-inflicting injury would be more inclined to engage in other health-risk behaviors than would someone who has not self-inflicted injury.
