

Key Concepts in Mathematics

Algebra: Study of mathematical structures and operations involving symbols and the rules for manipulating these symbols. Algebra is used to solve equations and inequalities, and to describe geometric shapes and figures.

Calculus: Study of continuous change, which includes the study of limits, differentiation, and integration.

Geometry: Study of shapes and sizes, including the properties of lines, angles, and surfaces. It involves the study of Euclidean and non-Euclidean geometries.

Trigonometry: Study of the relationships between the sides and angles of triangles, and the properties of the trigonometric functions.

Statistics: Study of the collection, analysis, interpretation, and presentation of data. It includes the study of probability and the theory of statistics.

Probability: Study of the likelihood of events occurring, and the study of random variables and stochastic processes.

Number Theory: Study of the properties of numbers, particularly the properties of prime numbers and the solutions of Diophantine equations.

Combinatorics: Study of the counting of objects, and the study of the properties of finite sets and combinatorial structures.

Graph Theory: Study of the properties of graphs, which are mathematical structures consisting of vertices and edges.

Topology: Study of the properties of spaces that are invariant under continuous deformations, such as stretching and bending.

Functional Analysis: Study of the properties of function spaces, and the study of the solutions of differential equations and partial differential equations.

Group Theory: Study of the properties of groups, which are mathematical structures consisting of a set of elements and a binary operation.

Ring Theory: Study of the properties of rings, which are mathematical structures consisting of a set of elements and two binary operations.

Field Theory: Study of the properties of fields, which are mathematical structures consisting of a set of elements and two binary operations, and a multiplicative inverse for every non-zero element.
