Guide for AWS Visual Weld Inspection

Overview & Contents

Scope	This guide is intended to assist Owner/Operators, Contractors, Authority Having Jurisdiction (AHJ) personnel, Inspectors, Manufacturers and Contractors/Fabricators in recognizing what is an appropriate weld inspection program and to audit their own current weld inspection program to determine if it is effective and compliant to AWS standards.
Background	Precisioneering is a company specializing in project management, welding consulting, inspection & qualification of welders. This document was created to address the Who , What , Why , and When in regard to visual weld inspection requirements on projects that reference AWS standards.
Introduction	<p>During years of performing inspections on statically-loaded structures, owners, manufacturers and other fabricators would be under the assumption that they were fabricating or making weld repairs in accordance with AWS standards. After further discussion or after auditing the weld programs to the actual AWS Standards, deficiencies would ultimately be discovered within these programs.</p> <p>After repetitively discovering similar deficiencies among many of these weld programs, it eventually lead to the creation of this guide. The intention is to share this information with the members of the industry, with the hope of improving knowledge of these standards. Compliance to these standards leads to a safer industry.</p>
Contents	<p>This guidance will address:</p> <ul style="list-style-type: none">• WHO can be an AWS inspector• WHAT type of inspection(s) should be performed• WHY do we follow AWS when welding• WHEN does the inspector actually have to conduct the inspection• Summary & Conclusion
