

GUIDE TO CLOUD COMPUTING

WHAT IS CLOUD COMPUTING?

Cloud computing is the on-demand delivery of IT resources over the internet with pay-as-you-go pricing. Instead of buying, owning, and maintaining physical data centers and servers, you use external, third-party providers, such as computing power, storage, and databases on an as-needed basis.

WHERE'S MY DATA?

Data typically goes to large data centers in the network, depending on the type of cloud. It's really just another way of storing existing data online. For example, many of us already use cloud computing when using the internet for storing photos and email.

WHAT ARE THE DIFFERENT TYPES OF CLOUD?

PRIVATE
Resources dedicated to one customer.

PUBLIC
Resources shared by multiple customers.

HYBRID
Customized combination of shared and dedicated resources.

COMMUNITY
Dedicated resources for a group of customers.

WHAT ARE THE DIFFERENT CLOUD SERVICES?

1. SOFTWARE-AS-A-SERVICE

It enables a user to be able to use an application without installing it on a computer or other type of device.

2. PLATFORM-AS-A-SERVICE

It allows third parties to build applications without buying hardware or installing software.

3. INFRASTRUCTURE-AS-A-SERVICE

It enables customers to use all components of users, to run their own software services.

WHY USE THE CLOUD?

Everything you need is always right at your fingertips. Whether you are on your desktop at the office, your smart phone waiting in line or on your tablet on the couch, everything is accessible through the internet.

REDUCE COST

Using the cloud saves money. It minimizes IT investments, reduces the physical storage space, minimizes physical maintenance, and saves money on expensive hardware. It saves the cost of buying expensive equipment & programs, you have a subscription that includes everything you need, and your software is always up to date.

COLLABORATION

Saving real accounting time on the cloud means everyone gets work from the same document. Most small/medium businesses don't have servers with the capacity to store large documents. The cloud offers a robust, secure, and scalable potential for collaboration.

REMOTE ACCESS

Employees and clients can access documents, files, and emails from anywhere in the world over a secure internet connection. They don't need any special hardware or any single device.

BACKUP SECURITY

Reduce the risk of losing files and data because of natural disasters, human error, hackers, and viruses by backing up your data off-site.

SAVE TIME

The cloud helps increase response time, reduce time to market, and enhance out-of-office work time.

WHY ARE COMPANIES SHIFTING TO CLOUD?

Fully Managed

Be confident in the knowledge that your cloud IT estate is fully managed, updated, protected, monitored, and maintained by the highest experts.

Ultimate Flexibility

Work from anywhere with an internet connection, log in to access the cloud on any PC, tablet or laptop. Collaborate in real-time, or whenever, from any, or just enable flexible working.

Always Up-to-date

Operating systems and software are continually, discreetly updated to their latest versions, ensuring up-to-the-minute security patches and the latest downtime during working hours.

Predictable Budgeting
Cloud is delivered as a monthly subscription. Say goodbye to costly infrastructure upgrades with predictable monthly budgeting.

Scale As Required
As and when your business changes in size we'll simply scale your cloud provision to match. Never pay for more than you actually need.

Business Continuity
Thinking about backup is a thing of the past, your cloud is regularly security tested, so in the event of an office disaster or computer failure you can recover and carry on as normal on any device.

Fully Managed
Be confident in the knowledge that your cloud IT estate is fully managed, updated, protected, monitored, and maintained by the highest experts.

Ultimate Flexibility
Work from anywhere with an internet connection, log in to access the cloud on any PC, tablet or laptop. Collaborate in real-time, or whenever, from any, or just enable flexible working.

Always Up-to-date
Operating systems and software are continually, discreetly updated to their latest versions, ensuring up-to-the-minute security patches and the latest downtime during working hours.
