encourages further research regarding the subject Companies need sustainable solutions to the pressure to deal with high levels of risk and uncertainty Many companies face this challenge and therefore must find new ways to deal with it These solutions are often based on digital influenced techniques Previously understood knowledge technologies and data provide a huge assist with this goal The Korean Wave in a Post-Pandemic World Geon-Cheol Shin, Mark D. Whitaker, 2023-11-02 This book presents an analysis of how the economic Korean Miracle spread into the cultural Korean Wave Hallyu First only in Asian countries and then around the world the rising popularity of the Korean Wave continued within the pandemic despite or even because of policies of digital lockdowns Partially this has been by design as Korea for decades has had a very strong fast development drive in telecommunications and that aided the growth of its cultural wave Partially however this became exclusively by default how the Korean Wave had to spread increasingly in a digital manner after 2020 globally in response to many countries rules regarding the COVID 19 pandemic in their attempts to enforce a decline in face to face content consumption In retrospect this has meant only more digital growth and innovation for the Korean Wave in past years compared to other cultures entertainment complexes that suffered more Korea s earlier digital readiness combined with later lockdownconditions and pushed the Korean Wave further ahead Despite the ending of COVID 19 lockdowns in many countries a greater digital aftermath will continue in the cultural industry and in the economy in general This is due to changes created in cultural preferences in organizational investments and in communication technologies due to those lockdowns Thus the authors examine how the Korean Wave coped actively with a pronounced digital shift by default in all aspects of media including production distribution and consumption In turn they examine how the greater digital shift in the world s culture and economy influenced the Korean Wave s entertainment performances TV dramas and cosmetics among other areas The authors analyze general trends in the Korean Wave s economics culture and technology along with specific strong cases of the K pop boy group BTS the cosmetics manufacturer Cosmax and the television series Squid Game Since the Korean Wavecontinues to grow in popularity within a more exclusive digital socialization future implications of such a competitive digital world economy and multi polar digital world culture are discussed for all countries as well *Strategic Analysis of Netflix in India. Possible Strategies and Recommendations* Gabriel Socha, 2020-07-03 Seminar paper from the year 2020 in the subject Economics International Economic Relations grade 1 3 New York University Leonard N Stern School of business language English abstract The paper focuses on strategic issues of the management of Netflix in India pointing to the following key question How can the company adapt its business model to gain a foothold in the Indian market Should the company conduct acquisitions to deal with the situations Or should Netflix exit India and shift focus to other global markets instead Netflix a leading American online media streaming and production company expanded successfully across the globe in the 2010s However in India a very important market for Netflix due to its large population and strong demand for video streaming Netflix seems to be struggling Dominant competitors and specific customer requirements have made growth

difficult for the firm In this case both Netflix and the Indian video streaming market are analyzed with several strategic options are compared The team of authors recommends purchasing local studios and production houses so that Netflix can continue to pursue its verticalization strategy and meet local consumer demands We also suggest Netflix adapt its price to appeal to more users as Indian users are generally more price sensitive While it might dilute Netflix premium brand we believe such risk can be mitigated by adopting a more bare bones lower cost subscription targeting the large number of Indian consumers who use their smartphones to access the internet
