

CODE SWITCHING

"Code-switching is a linguistic phenomenon in which speakers switch back and forth between two or more languages or language varieties in the context of a single conversation or utterance" (Rampton, 1995).

DEFINITION

Code-switching refers to the act of using multiple languages or language varieties in a single situation. It is regularly used by minority groups when switching between interactions within their subculture and interactions with the dominant culture.

EXAMPLE

In the classroom

Schools require students to use standard language expressions, and those growing up in minority communities must code-switch.

African American children, for example, constantly switch between African-American Vernacular English and standard English.
