Memory Change in the Aged David F. Hulstsch, 1998-11-13 Do memory abilities decline with aging Are changes in memory universal or differential Do they occur similarly or differently for all types of memory and to all aging persons These are some of the principal questions explored in the Victoria Longitudinal Study and presented in this volume Although there is a tremendous amount of research comparing the memory performance of younger and older adults very few studies have followed the same older adults over time Only through the use of such longitudinal methods can one directly observe changes in memory functioning with aging This monograph reports longitudinal data following the same individuals over a six year period The authors consider a variety of theoretical and methodological issues related to memory and aging

Energy from the Desert Keiichi Komoto, 2013 This 4th volume in the established Energy From The Desert series examines and evaluates the potential and feasibility of Very Large Scale Photovoltaic Power Generation VLS PV systems which have capacities ranging from several megawatts to gigawatts and to develop practical project proposals toward implementing the VLS PV systems in the future Comprehensively analysing all major issues involved in such large scale applications based on the latest scientific and technological developments and by means of close international co operation with experts from different countries From the

perspective of the global energy situation global warming and other environmental issues it is apparent that VLS PV systems can contribute substantially to global energy needs become economically and technologically feasible soon contribute significantly to the global environment protection contribute significantly to socio economic development Energy policies around the world are gradually changing direction to focus less on nuclear energy with the expectation to turn to denuclearization entirely with the negative impacts of nuclear energy while in parallel the importance of and expectations for renewable energy technologies are increasing drastically as possible energy infrastructure as well as environmental friendly technology This book recognises that very large scale solar electricity generation provides economic social and environmental benefits security of electricity supply and fair access to affordable and sustainable energy solutions and that VLS PV systems must be one of the promising options for large scale deployment of PV systems and renewable energy technologies

Scheler's Phenomenology of Community
Ernest W. Ranly, 1966 My own serious study of Max Scheler began in 1958 when I presented a Master's thesis to St Louis University under the direction of Professor Vernon Bourke on Scheler's value theory Three years later when I returned to complete my doctorate work at St Louis University I returned also to the study of Max Scheler In the meantime several more volumes of the *Gesammelte Werke* had appeared several new translations of Scheler were published and the whole area of phenomenology began to be more favorably accepted by the American intellectual community My doctoral dissertation was on Scheler's theory of community under the expert and careful direction of Professor James Collins The bulk of the present work is a direct result of my work at St Louis University I have never regretted the time and effort spent on the study of Scheler He can be classified as nothing short of a genius not only in the breadth of his interests but also in the vitality unity and depth of his thought Most students of Scheler criticize his lack of unity I claim to find strong lines of inner consistency throughout his writings In the second place my study of Scheler has put me into contact with many of the most dominant intellectual influences of the day
