Can We Survive Our Origins?

Pierpaolo Antonello, Paul Gifford, 2015-01-01 Are religions intrinsically violent as is strenuously argued by the new atheists Or as Girard argues have they been functionally rational instruments developed to manage and cope with the intrinsically violent runaway dynamic that characterizes human social organization in all periods of human history Is violence decreasing in this time of secular modernity post Christendom as argued by Steven Pinker and others Or are we rather at increased and even apocalyptic risk from our enhanced powers of action and our decreased socio symbolic protections Rene Girard s mimetic theory has been slowly but progressively recognized as one of the most striking breakthrough contributions to twentieth century critical thinking in fundamental anthropology in particular for its power to model and explain violent sacralities ancient and modern The present volume sets this power of explanation in an evolutionary and Darwinian frame It asks How far do cultural mechanisms of controlling violence which allowed humankind to cross the threshold of hominization i e to survive and develop in its evolutionary emergence still represent today a default setting that threatens to destroy us Can we transcend them and escape their field of gravity Should we look to or should we look beyond Darwinian survival What and where if anywhere is salvation

Research Methods for International Human Rights Law Damian

Gonzalez-Salzberg, Loveday Hodson, 2019-06-13 The study and teaching of international human rights law is dominated by the doctrinal method A wealth of alternative approaches exists but they tend to be discussed in isolation from one another This collection focuses on cross theoretical discussion that brings together an array of different analytical methods and theoretical lenses that can be used for conducting research within the field As such it provides a coherent accessible and diverse account of key theories and methods A distinctive feature of this collection is that it adopts a grounded approach to international human rights law through demonstrating the application of specific research methods to individual case studies By applying the approach under discussion to a concrete case it is possible to better appreciate the multiple understandings of international human rights law that are missed when the field is only comprehended through the doctrinal method Furthermore since every contribution follows the same uniform structure this allows for fruitful comparison between different approaches to the study of our discipline
