Our Posthuman Future:

Our Posthuman Future Francis Fukuyama, 2003-05 A social philosopher examines how the foundation of liberal democracy which is the belief that all human beings are equal by nature could be shattered by the biotechnology revolution

Our Posthuman Past David Edward Rose, 2021-06-09 Technological advances directly affect the human being's material existence and its self understanding The Enlightenment's intentional agent is due to specific technologies undergoing a fundamental transformation Yet if the ideological basis of this understanding the justness of social luck is not rejected then a new understanding of the subject which would avoid unfreedom in the territorialization of the digital world is made impossible This book offers a novel Hegelian reading of the posthuman discipline in order to propose a new subjectivity

Screening the Posthuman Missy Molloy, Pansy Duncan, Claire Henry, 2023 From AI to climate change recent technological ecological and cultural transformations have unsettled established assumptions about the relationship between the human and the more than human world *Screening the Posthuman* addresses a heterogeneous body of twenty first century films that turn to the figure of the posthuman as a means of exploring this development Through close analyses of films as diverse as *Kikou* dir Hirokazu Koreeda 2009 *Testrol* s l lekrol *On Body and Soul* dir Ildiko Enyedi 2017 and *Nomadland* dir Chlo Zhao 2020 this wide ranging volume shows that while often identified as the remit of science fiction the posthuman on screen crosses filmic genres national contexts and industrial settings In the process posthuman cinema emphasizes humanity's entanglement in broader biological technological and social worlds and exposes new models of subjectivity community and desire In advancing these arguments *Screening the Posthuman* draws on scholarship associated with critical posthumanist theory an ongoing project unified by a decentering of the human As the first systematic full length application of this body of scholarship to cinema *Screening the Posthuman* advocates for a rigorous posthumanist critique that avoids both humanist nostalgia and transhumanist fantasy in its attention to the excitements and anxieties of posthuman experience

Aldous Huxley Alessandro Maurini, 2017-01-30 Aldous Huxley *The Political Thought of a Man of Letters* argues that Huxley is not a man of letters engaged in politics but a political thinker who chooses literature to spread his ideas His preference for the dystopian genre is due to his belief in the tremendous impact of dystopia on twentieth century political thought His political thinking is not systematic but this does not stop his analysis from supplying elements that are original and up to date and that represent fascinating contributions of political theory in all the spheres that he examines from anti Marxism to anti positivism from political realism to elitism from criticism of mass society to criticism of totalitarianism from criticism of ideologies to the future of liberal democracy from pacifism to ecological communitarianism Huxley clearly grasped the unsolved issues of contemporary liberalism and the importance of his influence on many twentieth century and present day political thinkers ensures that his ideas remain indispensable in the current liberal democratic debate *Brave New World* is without doubt Huxley's most successful political manifesto While examining the impassioned struggle for the development of

all human potentialities it yet manages not to close the doors definitively on the rebirth of utopia in the age of dystopia

Liberal Democracy as the End of History Christopher Hughes, 2011-10-07 Francis Fukuyama claims that liberal democracy is the end of history This book provides a theoretical re examination of this claim through postmodernist ideas The book argues that postmodern ideas provide a valuable critique to Fukuyama s thesis and poses the questions can we talk about a universal and teleological history a universal human nature or an autonomous individual It addresses whether postmodern theories concerning the movement of time what it means to be human and what it means to be an individual subject can be accommodated within a theory of a history that ends in liberal democracy The author argues that incorporating elements of postmodern thought into Fukuyama s theory makes it possible to produce a stronger and more compelling account of the theory that liberal democracy is the end of history The result of this is to underpin Fukuyama s theory with a more complex understanding of the movement of time the human and the individual and to show that postmodern concepts can paradoxically be used to strengthen Fukuyama s theory that the end of history is liberal democracy The book will be of interest to students and scholars of political theory postmodernism and the work of Francis Fukuyama

The Nation, 2002 *Public Science in Liberal Democracy* Peter W. B. Phillips, Jene M. Porter, 2007 Regardless of whether science is practised in industry the academy or government its conduct inescapably shapes and is shaped by democratic institutions Moreover the involvement of science with public policy formation and democracy has dramatically increased over the centuries and by all accounts will continue to do so In order to understand the functioning of science and democracy it is necessary to acknowledge the complex relationship between them *Public Science in Liberal Democracy* aims to do this from an interdisciplinary perspective presenting an array of substantively different positions on the issues that it explores The volume focuses on three major questions Can science retain independence and objectivity in the face of demands to meet commercial and public policy objectives In what ways is scientific discourse privileged in the formation of public policy How can scientific knowledge and methodology be made compatible with the interdisciplinarity and integration required of public policy formation and discourse Representing a wide range of viewpoints the contributors to *Public Science in Liberal Democracy* come from Canada Europe the United States and Australia and include practising scientists as well as scholars working in the humanities and social sciences This timely and thought provoking collection makes an important contribution to the literature and will appeal to anyone interested in scientific research and its political and philosophical ramifications in democratic society
