Global Area Disturbed and Pressures on Biodiversity by Large-Scale Metal Mining Diego I. Murguía, 2015 The rising global demand for metals in a context of declining ore grades is driving the opening of new mines and the expansion of existing ones disturbing substantial land areas especially by open pits However how much land is currently disturbed globally How much land could be disturbed by metal mining in 2050 This study investigates the global area disturbed by mining of iron bauxite copper gold and silver for the first time The first part consists of the calculation of the specific land requirements i e the area newly disturbed caused by the ore extraction at the mine site The second part addresses the global area disturbed in the year 2011 whereas the third presents scenarios of how

such area might evolve until 2050 The last part addresses the current and future pressures on global biodiversity by metal mines and shows possibilities for the future opening of new mines in low biodiversity areas alleviating pressures in high biodiversity ones This study presents the findings of the author s dissertation hoping they are used as a frame to develop policies and incentives to reduce the amount of area directly disturbed by mines and their pressures on biodiversity *30th Anniversary Edition* Dek Terrell, Daniel Millimet, 2012-12-17 The 30th Volume of *Advances in Econometrics* is in honor of the two individuals whose hard work has helped ensure thirty successful years of the series Thomas Fomby and R Carter Hill

Monte Carlo Methods Sujaul Chowdhury,2021-02-24 This book is intended for undergraduate students of Mathematics Statistics and Physics who know nothing about Monte Carlo Methods but wish to know how they work All treatments have been done as much manually as is practicable The treatments are deliberately manual to let the readers get the real feel of how Monte Carlo Methods work Definite integrals of a total of five functions $F(x)$ namely $\sin x$ $\cos x$ e^x $\log_e x$ and $1/x^2$ have been evaluated using constant linear Gaussian and exponential probability density functions $p(x)$ It is shown that results agree with known exact values better if $p(x)$ is proportional to $F(x)$ Deviation from the proportionality results in worse agreement This book is on Monte Carlo Methods which are numerical methods for Computational Physics These are parts of a syllabus for undergraduate students of Mathematics and Physics for the course titled Computational Physics Need for the book Besides the three referenced books this is the only book that teaches how basic Monte Carlo methods work This book is much more explicit and easier to follow than the three referenced books The two chapters on the Variational Quantum Monte Carlo method are additional contributions of the book Pedagogical features After a thorough acquaintance with background knowledge in Chapter 1 five thoroughly worked out examples on how to carry out Monte Carlo integration is included in Chapter 2 Moreover the book contains two chapters on the Variational Quantum Monte Carlo method applied to a simple harmonic oscillator and a hydrogen atom The book is a good read it is intended to make readers adept at using the method The book is intended to aid in hands on learning of the Monte Carlo methods
