Conversational AI with Rasa Xiaquan Kong, Guan Wang, Alan Nichol, 2021-10-08

Create next level AI assistants and transform how customers communicate with businesses with the power of natural language understanding and dialogue management using Rasa

Key Features

- Understand the architecture and put the underlying principles of the Rasa framework to practice
- Learn how to quickly build different types of chatbots such as task oriented FAQ like and knowledge graph based chatbots
- Explore best practices for working with Rasa and its debugging and optimizing aspects

Book Description

The Rasa framework enables developers to create industrial strength chatbots using state of the art natural language processing NLP and machine learning technologies quickly all in open source

Conversational AI with Rasa starts by showing you how the two main components at the heart of Rasa work

Rasa NLU natural language understanding and Rasa Core

You ll then learn how to build configure train and serve different types of chatbots from scratch by using the Rasa ecosystem

As you advance you ll use form based dialogue management work with the response selector for chitchat and FAQ like dialogs make use of knowledge base actions to answer questions for dynamic queries and much more

Furthermore you ll understand how to customize the Rasa framework use conversation driven development patterns and tools to develop chatbots explore what your bot can do and easily fix any mistakes it makes by using interactive learning

Finally you ll get to grips with deploying the Rasa system to a production environment with high performance and high scalability and cover best practices for building an efficient and robust chat system

By the end of this book you ll be able to build and deploy your own chatbots using Rasa addressing the common pain points encountered in the chatbot life cycle

What you will learn

- Use the response selector to handle chitchat and FAQs
- Create custom actions using the Rasa SDK
- Train Rasa to handle complex named entity recognition
- Become skilled at building custom components in the Rasa framework
- Validate and test dialogs end to end in Rasa
- Develop and refine a chatbot system by using conversation driven deployment processing
- Use TensorBoard for tuning to find the best configuration options
- Debug and optimize dialogue systems based on Rasa

Who this book is for

This book is for NLP professionals as well as machine learning and deep learning practitioners who have knowledge of natural language processing and want to build chatbots with Rasa

Anyone with beginner level knowledge of NLP and deep learning will be able to get the most out of the book

Global Chatbots Marco

Gottschalk,2024-08-16 In the rapidly evolving digital landscape chatbots have become indispensable tools for businesses and individuals alike Global Chatbots serves as the ultimate guide to mastering AI powered conversational agents This comprehensive resource is designed for both experienced developers and newcomers providing essential knowledge and skills to create chatbots that not only engage but also enhance user experiences on a global scale Explore the Future of Communication Design and deploy intelligent chatbots Learn how to build chatbots that integrate seamlessly with various platforms and services leveraging advanced AI and natural language processing techniques Understand AI machine learning and NLP Discover the latest advancements in artificial intelligence machine learning and natural language processing that are revolutionizing interactions with technology Real world case studies Gain insights from successful chatbot implementations in sectors like e commerce customer service and healthcare showcasing their impact and effectiveness Why Choose This Book Comprehensive coverage This book offers in depth knowledge on chatbot development from fundamental principles to advanced strategies Practical insights Benefit from hands on tutorials and best practices for optimizing chatbot performance and user engagement Global perspective Explore the impact of chatbots across different regions with an emphasis on regional trends and cultural considerations Chatbots Master both basic and advanced techniques in chatbot development AI Harness artificial intelligence to create responsive and intelligent chatbots Conversational agents Design interactive agents capable of handling complex tasks and queries Natural language processing Enhance your chatbot s understanding and response capabilities through NLP Machine learning Apply machine learning algorithms to continuously improve chatbot performance
