Building Web Services with Java Stephen

Graham, Glen Daniels, 2004 In Building Web Services with Java Second Edition architects from IBM who helped create the core Web services standards explain how to use those standards to build Web services applications They go beyond the specifications and provide meaningful insights into both how and why these tools were designed as they are This revised edition covers the new SOAP 1.2 and WSDL 1.2 standards as well as other technologies developed since the first edition was published including the Java Web Services Developer Pack from Sun and the powerful Apache Axis Web services engine

Throughout the book the au **RESTful Java Web Services** José Sandoval, 2009 The approach we take is ideal for software developers with some or extensive programming experience we design a RESTful API which serves as our software specification and implement it with every framework discussed in the book there are no hypothetical examples only practical working applications This book is for Java developers who want to code RESTful web services using any of the open source RESTful frameworks available to date for example JAX-RS implementations such as Jersey and RESTEasy the Restlet lightweight framework or Struts 2 with the REST plug in You don't need to know REST as we cover the theory of REST and web services however you should be familiar with the Java language and have some understanding of Java web applications For each framework we develop the same web service outlined in Chapter 4 so there is lots of working code available This is a practical guide and the majority of the book is about coding RESTful web services and not just about the theory of REST
