A population of mice lived in a desert with gray sand. These drawings show how the population changed from time 1 to time 3.

1b. Suppose the mice in drawing 3 had babies. What color fur do you think most of the babies would have? Explain your reasoning.

Next, you will learn some vocabulary that is useful for analyzing how populations change and why.

- **Evolution** is defined as a change over time in the inherited characteristics of a population.
- **Fitness** is defined as the ability to survive and reproduce.

2. For the mice in the figure, which characteristic increased fitness?

3. The term fitness can have two different meanings, depending on what subject you are discussing.
