Gibbs, 2011-09-27 I have a theory that as a human race everything we do is based on our discomfort with boredom That is why people read books watch television listen to music and even interact with friends and family These are things that help us pass the time of our lives Most people only think about boredom as physically being mundane or inactive but boredom is also mental This is proven to be true because even when you have a good thought in your head you do not feel bored it is only once you are content with your thoughts that you start to feel bored Pretend like your life is on a graphing chart The absolute 0 of boredom is when you go to sleep After we wake up we go up on the chart and coast All day as a being we try to reach high points on our boredom chart People must remember though we are going to come back down on the chart after whatever it is that got us up on the chart is over So you should be mindful of what things you do just to fill your boredom or Idle Time **Photoshop CS Savvy** Stephen Romaniello, 2006-07-14 Savvy n Practical know how Just about anyone who works with digital images needs to know how to use Photoshop But its complexity can be confounding even to experienced users In Photoshop CS Savvy artist and teacher Steve Romaniello reveals the secrets behind Photoshop s power showing you how to combine theory with practical techniques to get results that are inspirational and satisfying Whether you re a graphic artist photographer web designer desktop publisher or if your goal is to become Photoshop savvy this is the book that will get you there Work your way through from cover to cover or zero in on any topic from setting up a Photoshop workflow to restoring old photos to creating a web photo gallery In Hands On tutorials you ll apply your knowledge in complex real world projects mastering the techniques your own work demands A 32 page full color section showcases numerous color related examples Coverage includes Core Photoshop Skills selections type layers paths paint effects alpha channels Quick Mask scanning transformations Features New in Photoshop CS Shadow Highlight correction photo filters Match Color Color Replacement Liquify enhancements automations support for raw camera files Image Retouching Dodge and Burn tools cloning and healing History Brush Dust and Scratches filter Color Management and Correction levels and curves color mapping hue and saturation channel mixing CMYK conversion printing Photoshop ImageReady and the Web page layout optimization image maps animations rollovers Advanced Techniques difficult selections
