Wu, Jing-Wen Lin, Chin-Cheng Chou, 2012-12-05 This edited volume of papers from the twenty first International Conference
on Chemical Education attests to our rapidly changing understanding of the chemistry itself as well as to the potentially
enormous material changes in how it might be taught in the future Covering the full range of appropriate topics the book
features work exploring themes as various as e learning and innovations in instruction and micro scale lab chemistry In sum
the 29 articles published in these pages focus the reader's attention on ways to raise the quality of chemistry teaching and
learning promoting the public understanding of chemistry deploying innovative technology in pedagogy practice and
research and the value of chemistry as a tool for highlighting sustainability issues in the global community Thus the
ambitious dual aim achieved in these pages is on the one hand to foster improvements in the teaching and communication of
chemistry whether to students or the public and secondly to promote advances in our broader understanding of the subject
that will have positive knock on effects on the world's citizens and environment In doing so the book addresses as did the
conference the neglect suffered in the chemistry classroom by issues connected to globalization even as it outlines ways to
bring the subject alive in the classroom through the use of innovative technologies
