English Studies Beyond the 'Center' Myles Chilton, 2015-11-06 This book addresses the shape of English studies beyond the center by analyzing how the discipline has developed and by considering how lessons from this analysis relate to the discipline as a whole The book aims to open a cross disciplinary conversation about the nature of the English major in both non Anglophone and Anglophone countries by addressing the tensions between language and literature pedagogy the relevance of a focus on hyper canonical Anglophone literature in a world of global Englishes world literature and multilingual students and by reflecting on the necessary contingency and cross purposes of blended literature and language classrooms Many of the book's points of discussion arise from the author's experience as an English professor in Japan where the particularities of English language and literature pedagogy raise significant challenges to Anglo centric critical and pedagogical assumptions English Studies Beyond the Center Teaching Literature and the Future of Global English therefore argues that English literature must make

a case for itself by understanding its place in a newly configured discipline Issues discussed in the book include English language and literature pedagogy in Japan The modes through which EFL and English literary studies converge and diverge Globalized English beyond the Anglo American perspective English classroom practices particularly in Japan **Journal of Commonwealth and Postcolonial Studies** ,2006 Beyond Post-colonialism. The construction of Identities Through Muting and Absenting of the Other. Ahmed Musa,2021-07-19 Essay from the year 2021 in the subject Cultural Studies Middle Eastern Studies grade 95 language English abstract This paper is an attempt to trace the absence of the West in the cultural creative modes of knowledge productions that emerged post the Arab social movements in Tunisia and Egypt Whenever we discuss or approach the subject of the construction of identities in post colonial studies the West who I represent here as the other is largely but not entirely perceived as consolidating against or formulating the identities of the East or the identities of the Rest This is evident in not only the revered works of prominent theorists like Edward Said Homi Bhabha and Gayatri Spivak but also in the works of other post colonial theorists and writers that emerged afterward However during the Arab Spring one of the most solidaristic and transcultural Arab movements that searched for more stable governing models at crossroads of global regional and national challenges creative new forms of formulating identities beyond post colonial theory emerged such as the Arab Spring poetic slogans as creative modes of knowledge production which moved away from the previous discourse of the post colonial Arab intellectuals built on a bifurcation identity and also in tandem revolting the internal regimes of knowledge production The new forms of cultural productions not only represented moments of self emergency social solidarity and construction of the self during traumatic moments but also in tandem absented and muted the West and East binaries and antithesis of representation Francophone Postcolonial Studies ,2005 Postcolonialism Michael J. F. Chapman,2008 Poses two questions Is there a role for the literary imagination in postcolonial studies And where may one locate South Africa or more generally South African perspectives in a field delineated primarily by northern institutional purposes and practices Panjab University Research Journal ,2007 **The Intimacies of Hatred** Rani Jean Neutill,2007 Beyond Columbine Julie A. Webber,2017 NOW IN PAPERBACK This book explores the hidden curriculum of American culture that is rooted in perceived inequality and the shame rage and violence that it provokes **Southern Postcolonialisms** Sumanyu Satpathy,2009 Southern Postcolonialisms is an anthology of critical essays on new literary representations from the Global South that seeks to re invent reorient the ideological disciplinary aesthetic and pedagogical thrust of Postcolonial Studies in accordance with the new and shifting politico economic realities transactions between the North and the South as well as within the Global South in an era of globalization Since the emergence of Postcolonial Theory in the 1980s the shape of the world has changed dramatically Old Cold War boundaries have shifted in the wake of the collapse of communism Globalization on an unprecedented scale has dramatically changed the meaning of time and space The rise of the US as a new imperial power has profound implications for the world order In the South new emerging

markets have challenged the older division of industrial e first world e tm and non industrial e third world e tm In most parts of the world the academy is struggling to keep up with these developments One result has been a major transnational turn in the humanities and social sciences Terms like e world history e tm e globalization e tm e glocalization e tm and e transnationalism e tm now dominate academic agendas worldwide These changing circumstances raise far reaching questions What does the new emerging world order mean for established models of postcolonial theory Is postcolonialism as a field of study being overtaken by models of globalization and transnationalism What implications do the new configurations in the South have for postcolonial theory This volume drawn from a major literary conference at Delhi University provides a set of perspectives on these questions With a majority of contributions by scholars from the South these research articles have a dual focus e they revisit older debates on postcolonial theory while suggesting new perspectives and directions

Beyond Postcolonialism Jasbir Jain,2006 Study on post 1950 Indic fiction Kwasi Wiredu and Beyond Sanya Osha,2005 Kwasi Wiredu is one of Africa s foremost philosophers whose thinking on conceptual decolonization in contemporary African systems of thought is well known Wiredu advocates a re examination of current African epistemic formations in order to subvert unsavoury aspects of tribal cultures embedded in modern African thought as well as deconstruct the unnecessary Western epistemologies to be found in African philosophical practices In this book Sanya Osha argues that Wiredu s apparent schematism falls short as a viable project and suggests that because of the very hybridity of postcoloniality projects seeking to retrieve the precolonial heritage are bound to be marred at several levels Language itself presents a major problems which Wiredu s thesis does not fully address BOOK JACKET Beyond Dichotomies Elisabeth Mudimbe-Boyi,2012-02-01 Beyond Dichotomies examines literary texts cultural production and concrete local practices within the context of modernity and globalization by focusing on the ways in which some societies confront the complexity of cultures reflected in new forms of knowledge narratives and subjectivities The contributors explore how particular societies negotiate the relations between the global and the local and use a geographical comparative perspective combined with an interdisciplinary approach to offer a diversity of views and illuminate the cultural impact of globalization on different societies around the world Africa Asia Europe and the Americas These societies face complex questions regarding people s histories identities and cultures that embody the ambivalence contradictions and anxieties generated by the process of globalization The contributors provide a compelling conclusion for a rethinking and reconfiguration of cultures and intercultural relations in today s global world in which dichotomized representations coexist with a discourse of globalization **Panjab University Research Bulletin** ,2007 **South Asia Bulletin** ,2007
