**Spectral Discretization-Based Eigen-Analysis of Time-Delay Systems** Hua Ye, Yutian Liu, Xiaofan Jia, 2025-07-04 This book focuses on the partial spectral discretization PSD based eigenvalue computation methods for large scale time delay systems Due to past dependence in the evolution of a system time delays may greatly affect the system's dynamics For example wide area damping controllers in the interconnected power systems are fed by remote synchrophasor measurements and thus inevitably introduce time delays into the control loop These delays ranging from tens to hundreds of milliseconds can deteriorate the performance of the controllers and further jeopardize the power system stability Therefore this book addresses two classes of efficient eigenvalue computation methods for time delay systems based on the PSD idea as well as their applications to power systems with inclusion of time delays The methods are expected to obtain the accurate stability boundary of time delay systems with affordable computational burden This book would appeal to engineers researchers and graduate students in power and control engineering as well as computational and applied mathematicians
