Reyes-Picknell, 2017-05-25 Reliability Centered Maintenance Reengineered Practical Optimization of the RCM Process with RCM R provides an optimized approach to a well established and highly successful method used for determining failure management policies for physical assets It makes the original method that was developed to enhance flight safety far more useful in a broad range of industries where asset criticality ranges from high to low RCM R is focused on the science of failures and what must be done to enable long term sustainably reliable operations If used correctly RCM R is the first step in delivering fewer breakdowns more productive capacity lower costs safer operations and improved environmental performance Maintenance has a huge impact on most businesses whether its presence is felt or not RCM R ensures that the right work is done to guarantee there are as few nasty surprises as possible that can harm the business in any way RCM R was developed to leverage on RCM s original success at delivering that effectiveness while addressing the concerns of the industrial market RCM R addresses the RCM method and shortfalls in its application It modifies the method to consider asset and even failure mode criticality so that rigor is applied only where it is truly needed It removes within reason the sources of concern about RCM being overly rigorous and too labor intensive without compromising on its ability to deliver a tailored failure management program for physical assets sensitive to their operational context and application RCM R also provides its practitioners with standard based guidance for determining meaningful failure modes and causes facilitating their analysis for optimum outcome Includes extensive review of the well proven RCM method and what is needed to make it successful in the industrial environment Links important elements of the RCM method with relevant International Standards for risk management and failure management Enhances RCM with increased emphasis on statistical analysis bringing it squarely into the realm of Evidence Based Asset Management Includes extensive experience based advice on implementing and sustaining RCM based failure management programs Reliability-centred Maintenance John Moubray, 1997 Reliability centred Maintenance is a process used to determine systematically and scientifically what must be done to ensure that physical assets continue to do what their users want them to do Widely recognised by maintenance professionals as the most cost effective way to develop world class maintenance strategies RCM leads to rapid sustained and substantial improvements in plant availability and reliability product quality safety and environmental integrity The author and his associates have helped users to apply RCM and its more modern derivative RCM2 on more than 600 sites in 32 countries These sites include all types of manufacturing especially automobile steel paper petrochemical pharmaceutical and food manufacturing utilities water gas and electricity armed forces building services mining telecommunications and transport This book summarises this experience in the form of an authoritative and completely practical description of what RCM2 is and how it should be applied The second edition has been comprehensively revised to incorporate the most recent developments in this field It includes more than 100 pages of new material on condition monitoring the analysis of functions

and failures human error the management of risk failure finding and the measurement of maintenance performance This book will be of immense value to maintenance managers and to anyone else concerned with the reliability productivity safety and environmental integrity of physical assets Its straightforward plant based approach makes the book especially well suited to use in centres of higher education John Moubrey BSc Mech Eng spent his early career developing and implementing maintenance management systems first as a plant engineer then as a consultant In the early 1980s he began to focus on the industrial application of RCM under the guidance of the late F Stanley Nowlan In 1986 he set up Aladon Ltd a consulting and training company based in Lutterworth UK He is currently managing director of Aladon which specialises exclusively in the development of reliability centre management processes and their application to physical assets Reliability-centered Maintenance F. Stanley Nowlan,1978 Reliability-centered Maintenance Stanley F. Nowlan,Howard F.
