important problems in the field of traffic and transport a high rate of fatal accidents in which pedestrians lose their lives Also missing or unattractive footpaths lead to a high probability of switching over to motorised transport modes by those pedestrians who can afford it and to the marginalisation of those who cannot afford it At the same time the topic bears good opportunities to come up with low tech cost effective and at the same time highly efficient solutions in terms of CO2 reduction Although for the reason that the topic is not on the top list of the political agenda there is a civil movement to push it forward and forcefully improve mobility and quality of life
