What Colour is your Building? David Clark,2019-07-25 Defining and reducing the carbon footprint of a new or refurbished building can be a daunting task There are lots of tools to measure the environmental impact of buildings but they all measure energy and CO2 in different ways and they do not measure the whole carbon footprint What Colour is your Building provides practical and pragmatic guidance on how to calculate and then compare the whole carbon footprint of buildings using one simple method looking at operating embodied and transport energy It will equip designers building owners occupiers planners and policy makers with the tools and knowledge that they will need to make decisions early on about where the big impacts will be in terms of reducing the carbon footprint of the building including A new simple approach to understanding the whole carbon impact of buildings Benchmarking data for operating energy performance A clear transparent method of separating landlord energy performance from tenant energy performance Simple diagrams and numbers to put renewable energy into perspective

Future Office Nicola Gillen,2019-07-15 The office is dead Long live the office Despite decades of predictions that the office is on the verge of extinction it is surviving and thriving Of course things are changing And changing fast Digital technologies are transforming not only the work we do but also the ways our workplaces are designed built and operated Automation and AI mean that some jobs will no longer exist whilst others will be created But the very essence of the workplace human interaction and collaboration remains as necessary as ever In fact it is the human focus that is driving this new age with four generations now in the workplace together for the first time Taking an interdisciplinary approach this book discusses the impacts of these changes on the future of work and workplace The latest technologies are also explored from voice and digital twins to new materials such as graphene and battery powered buildings

Acoustics and Noise Control R J Peters,2013-11-12 Acoustics and Noise Control provides a detailed and comprehensive introduction to the principles and practice of acoustics and noise control Since the last edition was published in 1996 there have been many changes and additions to standards laws and regulations codes of practice relating to noise and in noise measurement techniques and noise control technology so this new edition has been fully revised and updated throughout The book assumes

no previous knowledge of the subject and requires only a basic knowledge of mathematics and physics There are worked examples in the text to aid understanding and a range of experiments help students use complicated apparatus Thoroughly revised to cover the latest changes in standards codes of practice and legislation this new edition covers much of the Institute of Acoustics Diploma syllabus and has an increased emphasis on the legal issues relating to noise control Metric Handbook Pamela Buxton,2021-11-25 The Metric Handbook is the major handbook of planning and design data for architects and architecture students with over 100 000 copies sold to successive generations of architects and designers It remains the ideal starting point for any project and belongs in every design office The seventh edition references the latest regulations and construction standards and includes new chapters on data centres and logistics facilities alongside basic design data for all the major building types For each building type the book gives the basic design requirements and all the principal dimensional data and succinct guidance on how to use the information and what regulations the designer needs to be aware of As well as buildings the Metric Handbook deals with broader aspects of design such as materials acoustics and lighting and general design data on human dimensions and space requirements The Metric Handbook is the unique reference for solving everyday planning problems Starting a Practice Simon Foxell,2021-09-21 Running your own practice can bring immense job satisfaction but it is not without its risks Do you have all the information at hand to set up confidently on your own Comprehensive accessible and easy to use Starting a Practice helps architects navigate the pitfalls associated with establishing a successful business This fully updated 3rd edition is mapped to the RIBA Plan of Work 2020 and approaches starting a business as if it were a design project complete with briefing sketching layouts and delivery It features new material on professionalism and ethics sustainable development and achieving a net zero carbon emission built environment Invaluable for Part 3 students early practitioners and those considering setting up from scratch or wanting to consolidate an existing business Starting a Practice gives architects the tools they need to thrive when setting out alone Features essential guidance on Preparing a business plan Choosing the right company structure Setting aspirations Monitoring finances Getting noticed Securing work Retaining and developing staff Planning for disaster Green Buildings Pay Brian Edwards,Emanuele Naboni,2013-08-22 This third edition of Green Buildings Pay presents new evidence and new arguments concerning the institutional and business case that can be made for green design The green argument has moved a long way forward since the previous edition and this fully updated book addresses the key issues faced by architect engineer and client today Green Buildings Pay Design Productivity and Ecology examines through a range of detailed case studies how different approaches to green design can produce more sustainable patterns of development These cases are examined from three main perspectives that of the architect the client and the user Completely revised with all new chapters cases sections and introductory material the third edition presents over 20 new researched case studies drawn from the UK Europe and the USA written in collaboration with the architects engineers clients and user groups examples of office and educational buildings of

high sustainable and high architectural quality an exploration of the architectural innovations that have been driven by environmental thinking such as the new approaches to the design of building facades roofs and atria cases which demonstrate current practice in the area of energy eco retrofits of existing buildings documentation of the benefit impact assessment schemes such as LEED and BREEAM have had upon client expectations and on design approaches over the past decade beautiful full color illustrations throughout In the fast evolving arena of green building the book shows how architects are reshaping their practices to deal with ever more demanding energy standards and better informed users and corporate clients

Sustainability Sandy Halliday, Richard Atkins, 2019-07-05 Sustainability is part of a brand new series providing must read practical guidance to running efficient and successful projects using the new RIBA Plan of Work 2013 Each guide takes a core project task in this case those associated with achieving sustainable design and construction and explains the essential activities required at each stage Concise and easy to use with a consistent format these guides provide the ultimate quick reference support at your desk or on site An authoritative how to full of pragmatic advice examples and in text features such as hints and tips that illuminate best practice and clever solutions Designed to be used on all projects large and small and across all types of procurement they are task rather than role oriented acknowledging that a variety of people take on these responsibilities They are also invaluable for architectural students at Part 3 who are getting to grips with the realities of practice

Building Services Journal ,2007 The Architects' Journal ,2003 *Directory of British Associations & Associations in Ireland* ,2005 **The Director** ,2008-08 *Better Places to Work* Great Britain. Commission for Architecture and the Built Environment, Llewelyn Davies Yeang (Firm), 2005 Better Places to Work is concerned with those elements of the design and development of workplaces that the planning system can influence It explores issues around location the public realm architecture and linkages It is based on the principle that well designed accessible and pleasant living and working environments are one of the key requirements for creating sustainable communities as set out in The Sustainable Communities Plan Building for the Future The authors believe that it is important to get new development right given the growth of the employment sector and that poor planning and design risk a return to some of the mistakes made in the past Better Places to Work demonstrates that badly located and designed places of work are not only bad for the wider environment they are also bad for business Evidence collated by and for CABI shows that well planned workplaces are good for business productivity and efficiency good for recruitment retention and employee satisfaction and good for the balance sheet they are much more cost effective over the lifetime of the building It focuses on ten exemplar developments from around England and uses case studies to offer guidance to all those involved in all stages of the development process This includes designers and developers local planning authorities property agents and all those who occupy business premises As a challenge and inspiration to everybody within the development industry this guide draws on lessons of success stories to show how the planning for our workplaces can be improved for the benefit of all involved *Encyclopedia of Architectural*

Technology Jacqueline Glass, 2002-04-03 Constant technological advancements are opening up dramatic new possibilities for the built form at the same time architects are developing innovative designs which require new techniques to make these ideas reality The Encyclopedia of Architectural Technology is the first book to specifically address these two issues by providing a comprehensive reference to modern architectural technologies encompassing all key aspects of construction structures environmental design and servicing The Encyclopaedia features over 180 entries ranging from materials and techniques to notable innovators in architecture and engineering Each entry includes a brief quick reference summary followed by a more detailed text and suggestions for further reading Besides technological terms entries are included on related topics such as sick building syndrome and sustainability Key engineers Ove Arup and Ted Happold have dedicated entries as do a range of ground breaking architects such as Le Corbusier Norman Foster Walter Gropius Herzog de Meuron Oscar Niemeyer Richard Rogers Carlo Scarpa Frank Lloyd Wright Ken Yeang and many others Workplace ,1998
