**Atomic Days** Joshua Frank,2022-10-11 Once home to the United States s largest plutonium production site the Hanford Nuclear Reservation in Washington state is laced with 56 million gallons of radioactive waste The threat of an explosive accident at Hanford is all too real an event that could be more catastrophic than Chernobyl The EPA designated Hanford the most toxic place in America it is also the most expensive environmental clean up job the world has ever seen with a 677 billion price tag that keeps growing Huge underground tanks well past their life expectancy and full of boiling radioactive gunk are leaking infecting groundwater supplies and threatening the Columbia River Whistleblowers worried that the worst is ahead are now speaking out begging to be heard and hoping their pleas help bring attention to the dire situation at Hanford Aside from a few feisty community groups and handful of Indigenous activists there is very little public scrutiny of the clean up process which is managed by the Department of Energy and carried out by contractors with shoddy track records like Bechtel In the context of renewed support for atomic power as a means of combating climate change Atomic Days provides a much needed refutation of the myths of nuclear technology from weapons to electricity and shines a spotlight on the ravages of Hanford and its threat to communities workers and the global environment **Plummer v. outstanding figures collectively chronicle America's industrial rise since World War II and share their perspectives on what lies ahead in the age of technology. In engaging and often humorous terms these men describe how they managed to make the most of the economic and social ups and downs of the past decades, how boldness, clear thinking, and a willingness to learn saw them through the bad times and paved the way to their success. No other book gathers so distinguished a group of business figures. Stephen D. Bechtel Jr. of Bechtel Group describes the rise, decline, and rise again of the world's largest heavy construction company. William M. Haney III of Molten Metal Technology, a strong believer in Goethe's maxim, overviews the opportunities in ecotechnology. Edward C. Johnson 3d of Fidelity writes on the adventures of a contrarian in the financial arena. Gordon E. Moore of Intel explains how his firm became one of the world's largest producers of microprocessor chips and forecasts the future of the electronics industry. John F. Taplin, master inventor and founder of a number of companies, writes on the education of an inventor-entrepreneur. Thomas D. Cabot of Cabot Corporation, Robert Galvin of Motorola, George N. Hatsopoulos of Thermo Electron Corporation, and Ralph Landau of Halcon International round out this group of master builders of America's industrial power. In an introduction and summing up, Alfred Chandler Jr., Pulitzer Prize-winning business historian, explores some of the themes that emerge from the personal essays. **Capturing the spirit of innovation as well as the practicalities of business decision making, The Power of Boldness will be required reading for business executives, students of business, and anyone interested in the individual success stories behind America's technological leadership.**

The world as we know it is undergoing a sudden and violent transformation unlike anything the planet has experienced since the Cretaceous Extinction. The evidence is all around us: vast droughts that last decades, super storms and floods that destroy cities, dwindling aquifers, vanishing glaciers, toxic water supplies, raging wildfires, obscure new diseases, vanishing species, and indigenous communities. Our planet is changing faster than evolution can keep up. The forces driving this radical transformation are not natural. The earth has been brought to the brink by a greed-based predatory economic system that chews up anything in its path and spits it out to the bitter end. Environmental journalists Jeffrey St. Clair and Joshua Frank take you on a sobering field trip through the danger zones: from the strip mines of Appalachia to the last refuge of the grizzly, from the dirty fracking fields to the world's most dangerous place, the Hanford Nuclear Site in the Pacific Northwest. **The Big Heat** charts the battle lines for the future of the planet: from corporate villains to corrupt politicians and the fearless environmentalists who are standing up against the pillaging. This is an unflinching chronicle of the last fight that really matters.
