Bioactive Components Of Milk:

Bioactive Components of Milk Zsuzsanna Bosze, 2007-12-26 Dairy foods have huge potential concerning functional foods. Therefore there is a tremendous amount of interest in value added milk products and the identification of components in food which have health benefits. This book provides an overview of these derived components and their diverse activities including the stimulation of beneficial microflora alerting the immune system to the presence of potential pathogens and allergens binding and eliminating toxins etc. *Bioactive Components in Milk and Dairy Products* Young W. Park, 2009-06-30 Although bioactive compounds in milk and dairy products have been extensively studied during the last few decades especially in human and bovine milks and some dairy products very few publications on this topic are available especially in other dairy species milk and their processed dairy products. Also little is available in the areas of bioactive and nutraceutical compounds in bovine and human milks while books on other mammalian species are non-existent. *Bioactive Components in Milk and Dairy Products* extensively covers the bioactive components in milk and dairy products of many dairy species including cows, goats, buffalo, sheep, horse, camel and other minor species. Park has assembled a group of internationally reputed scientists in the forefront of functional milk and dairy products, food science and technology as contributors to this unique book. Coverage for each of the various dairy species includes bioactive proteins and peptides, bioactive lipid components, oligosaccharides, growth factors and other minor bioactive compounds such as minerals, vitamins, hormones and nucleotides etc. Bioactive components are discussed for manufactured dairy products such as caseins, caseinates and cheeses, yogurt products, koumiss and kefir and whey products. Aimed at food scientists, food technologists, dairy manufacturers, nutritionists, nutraceutical and functional foods specialists, allergy specialists, biotechnologists, medical and health professionals and upper level students and faculty in dairy and food sciences and nutrition. *Bioactive Components in Milk and Dairy Products* is an important resource for those who are seeking nutritional health and therapeutic values or product technology information on milk and dairy products from the dairy cow and species beyond. Areas featured are: Unique coverage of bioactive compounds in milks of the dairy cow and minor species including goat, sheep, buffalo, camel and mare. Identifies bioactive components and their analytical isolation methods in manufactured dairy products such as caseins, caseinates and cheeses, yogurt products, koumiss and kefir and whey products. Essential for professionals as well as biotechnology researchers specializing in functional foods, nutraceuticals, probiotics and prebiotics. Contributed chapters from a team of world renowned expert scientists. *Bioactive Components in Milk* Zsuzsanna Bosze, 2020 **Bioactive Components of Human Milk** David S. Newburg, 2012-12-06 The major emphasis in this book is a compilation and definition of what is known about components of human milk including glycoconjugates that inhibit common pathogens of the infant. Also discussed are other bioactive constituents whose relevant biological roles are also beginning to be defined. Hormonal and cytokine activity, immunomodulating and autoinflammatory agents, xenobiotics and conditionally essential nutrients in milk could have roles in the protection of the infant but may also

participate in digestive processes maternal infant communication maturation of the gut central nervous system and other components of infant growth and development Like the protective activities these are discussed in terms of their presence in milk structures potential functions and structure function relationship Components whose role is nutritional support during early development of the infant are also included *Bioactive Components of Milk* K. Instant Insights: Nutritional benefits of milk Dr Jan Geurts, Shane V. Crowley, Dr James A. O'Mahony, Patrick F. Fox, Young W. Park, Prof Michael Gänzle, 2023-02-21. This collection features four peer-reviewed reviews on the nutritional benefits of milk. The first chapter highlights the important role of milk and dairy products in human diets due to the amount of energy/calories they provide and their ability to compensate for foods in the diet with lesser nutritional value. The chapter also reviews the dairy matrix concept and how this matrix can influence human physiology. The second chapter provides an overview of major and minor milk proteins, including caseins, whey proteins, and indigenous milk enzymes. The chapter discusses a selection of milk protein products which are produced on an industrial scale to support human health and growth, such as the use of whey protein in infant formula and dietary supplements. The third chapter reviews current knowledge on bioactive components existing in cow's milk and colostrum, their biological and nutritional functionalities, as well as how these components can be exploited for the benefit of human health and physiological metabolism function. The final chapter provides an overview of the nutritional properties of dairy carbohydrates and major glycoproteins in cow's milk. The chapter considers the contribution of lactose as a substrate for beneficial colonic fermentation to short-chain fatty acids, as well as the importance of glycoproteins in infant diets.

Milk and Dairy Products as Functional Foods Ara Kanekanian, 2014-04-09. There continues to be strong interest within the food industry in developing new products which offer functional health benefits to the consumer. The

premium prices that can be charged make these added value products lucrative for manufacturers and they are also commercially popular Dairy foods are central to this sector they are good delivery systems for functional foods yoghurts milk drinks spreads and are also rich in compounds which can be extracted and used as functional ingredients in other food types Milk and Dairy Products as Functional Foods draws together a wealth of information regarding the functional health benefits of milk and dairy products It examines the physiological role and the claimed health effects of dairy constituents such as proteins bioactive peptides conjugated linoleic acid CLA omega 3 fatty acids vitamin D and calcium These constituents have been shown to be for example anticarcinogenic anti inflammatory antihypertensive hypocholesterolemic immune modulating and antimicrobial This book examines the evidence for these claims and investigates practical approaches for utilising these attributes The book is aimed at dairy scientists and technologists in industry and academia general food scientists and technologists microbiologists and nutritionists together with all those involved in the formulation and production of functional food products

Park,2016 *Human Milk, Nutrition and Infant Development* Claude Billeaud,Veronique Demers-Mathieu,Francisco José Pérez-Cano,2024-12-13 Breast milk is the model for infant feeding Human milk is composed of a thousand substances some of which have the function of nutrients with others the most numerous having bioactive properties Breast milk composition differs between mothers due to maternal background immunity nutrition lifestyle and other confounding factors In addition the same mother s milk composition varies over time colostrum contains the highest level of active proteins compared to transitional and mature breast milk to provide maximal immunity to the newborn Indeed the levels of bioactive proteins and macronutrients are higher in preterm milk than in full term milk to promote their development and compensate for their immaturity Breast milk composition is also affected by the mother s diet Although milk proteins and carbohydrates are only slightly influenced there is a strong correlation between dietary lipids and breast milk as well as minerals vitamins and trace elements Besides these factors other situations globally considered as the exposome can have also an influence on human milk composition But it is an endless challenge when a new component is discovered in the mother s milk to determine its exact role
