

12. The grass and species names are collectively referred to as the scientific name. It is written in a Latin format as binomial nomenclature, a two name Latin naming system. There are three rules for writing a scientific name using the system. Analyze the information in Model 2 to complete the table below.

**Rule 1:** The scientific name is always written in 2 names, with the genus name written capitalized and the species name lowercase.

**Rule 2:** The scientific name is always written in Latin. It is handwritten, it is italicized, and it is underlined.

**Rule 3:** The first letter of the genus name is a capital letter.

13. The species is used to name the world. Why do you think Latin is used instead of a more popular language?

Yes, in early approach. No world. Also, Latin is formal language. It's universal.

14. Using the system, would it be possible for two different species to have the same name?

No

15. In Linnaeus's time, classification was based on the appearance of organisms. This does the appearance of organisms such as shape and legs, shells and feathers, and pigmentation and eyes. What are the limitations of describing organisms by only their appearance?

You may miss something. Group together things together.

But this was not feasible - many but not only only only.

16. Considering advances in science, discuss with your group what might be a more reliable way to study organisms. List at least three additional ways to study organisms.

- Behavior
- Ways to obtain food
- Adaptions to environment
- DNA analysis
