Dalhuisen on Transnational Comparative, Commercial, Financial and Trade Law Volume 3 Jan H Dalhuisen, 2019-06-13

This is the seventh edition of the leading work on transnational and comparative commercial financial and trade law covering a wide range of complex topics in the modern law of international commerce and finance. As a guide for students and practitioners it has proven to be unrivalled. The work is divided into three volumes each of which can be used independently or as part of the complete work. Volume 3 deals with financial products and financial services, the structure and operation of banking and of the capital markets, the role of modern commercial and investment banks and financial risk stability and regulation including the fallout from the 2008 financial crisis and the subsequent regulatory responses in the US and Europe. In sections on products and services, the blockchain and its potential are noted in the payment system, in the custodial holdings of investment securities and in the derivative markets. A section on regulation critically reviews the need for macro prudential supervision and an independent macro prudential supervisor, the role of resolution authorities, the operation of the shadow banking system and the extraterritorial reach and international recognition of financial regulation. All three volumes may be purchased separately or as part of a single set.

**Dalhuisen on Transnational and Comparative Commercial, Financial and Trade Law Volume 5** Jan H Dalhuisen, 2022-06-16 presents a very different case than that of a civilized and cultivated cosmopolitan legal scholar with a keen sense of international commercial and financial practice with an in-depth grounding in both comparative legal history and comparative law combined with the ability to transcend conventional English black letter law description with critical judgment towards institutional wisdom and intellectual fashions. International and Comparative Law Quarterly Volume 5 of this new edition uses the insights developed in Volumes 3 and 4 to deal with financial products and financial services, the structure and operation of banking and of the capital markets and the role of modern commercial and investment banks. Sections on products and services address the blockchain and its potential in the payment system, in securitisations, in the custodial holdings of investment securities and in the derivative markets. The complete set in this magisterial work is made up of 6 volumes. Used independently, each volume allows the reader to delve into a particular topic. Alternatively, all volumes can be read together for a comprehensive overview of transnational comparative commercial financial and trade law.
