IBM Spectrum Scale is a proven scalable high performance data and file management solution It provides world class storage management with extreme scalability flash accelerated performance automatic policy based storage that has tiers of flash through disk to tape It also provides support for various protocols such as NFS SMB Object HDFS and iSCSI Containers can leverage the performance information lifecycle management ILM scalability and multisite data management to give the full flexibility on storage as they experience on the runtime Container adoption is increasing in all industries and they sprawl across multiple nodes on a cluster The effective management of containers is necessary because their number will probably reach a far greater number than virtual machines today Kubernetes is the standard container management platform currently being used Data management is of ultimate importance and often is forgotten because the first workloads containerized are ephemeral For data management many drivers with different specifications were available A specification named Container Storage Interface CSI was created and is now adopted by all major Container Orchestrator Systems available Although other container orchestration systems exist Kubernetes became the standard framework for container management It is a very flexible open source platform used as the base for most cloud providers and software companies container orchestration systems Red Hat OpenShift is one of the most reliable enterprise grade container orchestration systems based on Kubernetes designed and optimized to easily deploy web applications and services OpenShift enables developers to focus on the code while the platform takes care of all of the complex IT operations and processes This IBM Redbooks publication describes how the CSI Driver for IBM file storage enables IBM Spectrum Scale to be used as persistent storage for stateful applications running in Kubernetes clusters Through the Container Storage

Interface Driver for IBM file storage Kubernetes persistent volumes PVs can be provisioned from IBM Spectrum Scale Therefore the containers can be used with stateful microservices such as database applications MongoDB PostgreSQL and so on
