

Conceptual Physics - **Pressure**

Problem 1: Liquid Pressure
Continuation of Page 100

As you worked with the liquid pressure apparatus, you noticed that pressure increases with depth. This is because the weight of the liquid above exerts a downward force on the liquid below. The pressure at any point in a liquid is due to the weight of the liquid above it. The pressure is the same in all directions at any point in a liquid. The pressure in a liquid is given by the equation $P = \rho gh$, where P is the pressure, ρ is the density of the liquid, g is the acceleration due to gravity, and h is the depth of the liquid.

Key Concept: Pressure
 Pressure is the force exerted per unit area. It is a scalar quantity. The pressure in a liquid is due to the weight of the liquid above it. The pressure is the same in all directions at any point in a liquid.

- 1. The pressure in a liquid is due to the weight of the liquid above it. The pressure is the same in all directions at any point in a liquid.
- 2. The pressure in a liquid is given by the equation $P = \rho gh$, where P is the pressure, ρ is the density of the liquid, g is the acceleration due to gravity, and h is the depth of the liquid.
- 3. The pressure in a liquid is the same in all directions at any point in a liquid.

Honoré Fabri and the Concept of Impetus: A Bridge between Conceptual Frameworks Michael Elazar,2011-05-20 This book discusses the impetus based physics of the Jesuit natural philosopher and mathematician Honoré Fabri 1608 1688 a senior representative of Jesuit scientists during the period between Galileo s death 1642 and Newton s Principia 1687 It shows how Fabri while remaining loyal to a general Aristotelian outlook managed to reinterpret the old concept of impetus in such a way as to assimilate into his physics building blocks of modern science like Galileo s law of fall and Descartes principle of inertia This account of Fabri s theory is a novel one since his physics is commonly considered as a dogmatic rejection of the New Science not essentially different from the medieval impetus theory This book shows how New Science principles were taught in Jesuit Colleges in the 1640s thus depicting the sophisticated manner in which new ideas were settling within the lion s den of Catholic education

Pauley, 2005 *Technical Report Writing Today* provides thorough coverage of technical writing basics techniques and applications. Through a practical focus with varied examples and exercises students internalize the skills necessary to produce clear and effective documents and reports. Project worksheets help students organize their thoughts and prepare for assignments and Focus boxes highlight key information and recent developments in technical communication. Extensive individual and collaborative exercises expose students to different kinds of technical writing problems and solutions. Annotated student examples more than 100 in all illustrate different writing styles and approaches to problems. Numerous short and long examples throughout the text demonstrate solutions for handling writing assignments in current career situations. The four color artwork in the chapter on creating visuals keeps pace with contemporary workplace capabilities. The Ninth Edition offers many new examples, exercises, samples, and articles the latest information on using electronic resumes and documenting electronic sources more on group work and new Ethics and Globalization sidebars that highlight these two important topics in the technical communication field. Chapter exercises have been labeled to guide students in various goals: You create, You analyze, You revise, and Group. In this revision the authors have focused on streamlining and updating key chapters rather than on substantially changing the text's effective organization. Chapter 1, Definition of Technical Writing, has been thoroughly revised to include complete sections on ethics and globalization. Theoretical sections have been updated to include current thinking about the role of communication between people. New exercises and examples are included. Chapter 2, Profiling Audiences, has been completely revised to feature current thinking about defining audiences including an emphasis on the tasks that audiences must perform after reading and a section on creating audience profiles. Worksheets have been revised and a section on meeting quality benchmarks has been added. Chapter 3, The Technical Writing Process, substantially updated, offers a current description of the document creation process and includes recent thinking on information design. Chapter 6, Designing Pages, has been revised and simplified to make the complex process of page design easier for students to grasp. Chapter 12, Memorandums and Informal Reports, heavily revised, now includes more emphasis on and new examples of the IMRD report format. The chapter also includes a focus section with an expanded treatment of email. Chapter 15, Recommendation and Feasibility Reports, presents a new feasibility report created by a small business to determine whether or not to market an item. Chapter 18, Oral Presentations, now focuses on PowerPoint. The theory of oral reports is expanded to include recent criticisms of

PowerPoint presentations and advice on creating effective presentations Appendixes include A Brief Handbook Appendix A focusing on the sentence punctuation and mechanics issues most relevant to technical writing and Documenting Sources Appendix B covering the most up to date APA and MLA methods for documenting print and electronic sources The text specific instructor web site features such resources as sample syllabi a transition guide an assessment guide and chapter by chapter teaching suggestions The student site offers additional student samples including web sites built by their peers cha
