Boundaries Between Bodies and Technologies Bianca Maria Pirani, Ivan Varga, 2008 The new boundaries between bodies and
 technologies constitute one of the most important developments in the last fifty years Through technologies we not only
 change the relations between a natural given the body and a human made artefact the technology but also change the ways
 we experience the world How close are we to a world in which the abilities of machines are indistinguishable from those of
 the species that invented them Our encounters with the new technologies change the cognitive processes and influences the

modes of processing information Moreover it raises the question of the nature of human beings Traversing body as emotive being in the world and body as location culturally and socially constructed there is a third dimension the dimension of technological Are we able to use these new dimension as a creative interface between the emotional brain the acting body and ICTS In answering these questions the book explores the action of bodies in technology that is how the sense of our bodies and of our orientation in the world are affected by information and communication technologies It contributes therefore to the world wide discussion and debates on the impact of technology especially information technology on the lives of human beings in the age of globalization in particular to the present thinking of the relationship between technology and embodiment
