MANAGEMENT AND COST ACCOUNTING COLIN M. DRURY, 2013-12-11 **Management and Cost Accounting**

Colin Drury, 1996 The market leading European text on management accounting and comprehensive authority on all aspects of the subject has been streamlined and substantially redesigned in its 6th edition to make it even more suitable for the needs of today's student. The aim of the new edition is to explain the principles involved in the design and evaluation of management and cost accounting information systems. The emphasis in the book is on management accounting systems that will be used for internal decision making purposes within an organisation; however, cost accounting systems for external reporting are also comprehensively covered. It has been brought up to date with the latest developments in the subject. Having been made stronger pedagogically with the addition of the answers to the questions and more real world mini cases, the text brings home the relevance of the subject matter to the real world of business.

The problems and solutions allow students to pursue topics in more depth and to concentrate on the application of principles in management and cost accounting. The key topics are covered in detail and provide a superb opportunity to practise answering exam questions, many of which are taken from past papers of professional accountancy bodies such as CIMA, ACCA, AAT, ICAEW and ICAI.

Costing of Health Care Services in Developing Countries Steffen Fleßa, 2009 The process of health care reforms must be based on demographic, epidemiological and economic evidence if it is to achieve the fundamental target of affordable, sustainable and efficient health care services for the entire population. Consequently, costing of health care services has become a frequently used element of health care reforms. This book presents the essentials of costing in a health economic framework and gives examples from successful costing studies done by the author in Tanzania, Vietnam and Burkina Faso. Based on these examples, it demonstrates the importance of costing information for the planning and decision making process in the field of budgeting.
