Abraham,A. certain that the gain in information justifies such an increase in size However that may be the initial plan has survived Without Mr Boiteux this book would never have been undertaken it is a pleasant duty for us respectfully to acknowledge our debt to him here Microeconomic analysis that is to say that analysis which results from the study of the behaviour and activities of individual decision units was for a long time the main concern of the neo classicists Quite recently the introduction of macroeconomic theory dealing with aggregate quantities seemed to relegate it to second place But this is not where it belongs we tend to agree with Mr Raymond Barre that there are two different scales of analysis that complement rather than contrast with one another **Management 405** ,2012 *Books in Print* ,1991
