REVISION METHOD

Create a charge

To charge a credit card or other payment source, you create a `Charge` object. If your API key is in test mode, the supplied payment source (e.g., `card`) won't actually be charged, although everything else will occur as if in live mode. (Stripe assumes that the charge would have completed successfully).

Arguments

| | |
|---|--|
| amount <small>required</small> | A positive integer representing how much to charge, in the smallest currency unit (e.g., 100 cents to charge \$1.00, or 100 to charge ¥100, a zero-decimal currency). The minimum amount is \$0.50 USD or equivalent in charge currency. |
| currency <small>required</small> | Three-letter ISO currency code, in lowercase. Must be a supported currency. |
| application_fee <small>optional</small> | A fee in cents that will be applied to the charge and transferred to the application owner's Stripe account. The request must be made with an OAuth key or the <code>Stripe-Account</code> header in order to take an application fee. For more information, see the application fees documentation. |

POST /v1/charges

Example Request

```
curl https://api.stripe.com/v1/charges \
  -H 'sk_test_4e238b20c83c7628b3f2674672d9e30bd625c692' \
  -d 'amount=100' \
  -d 'currency=usd' \
  -d 'source[tok_visa]' \
  -d 'description=Charge for jenny.ross@example.com'
```

Example Response

```
{
  "id": "ch_1922121ed0712003aw0194",
  "object": "charge",
