Open Access and the Future of Scholarly Communication Kevin L. Smith,Katherine A. Dickson,2016-12-08 This volume the second of two in the series Creating the 21st Century Academic Library that deals with the topic of open access in academic libraries focuses on the implementation of open access in academic libraries Chapters on the legalities and practicalities of open access in academic libraries address the issues associated with copyright licensing and intellectual property and include support for courses that require open access distribution of student work The topic of library services in support of open access is explored including the library s role in providing open educational resources and as an ally and driver of their adoption for example by helping defray author fees that are required for open access articles A detailed look at open access in the context of undergraduate research is provided and considers how librarians can engage undergraduates in conversations about open access Chapters consider ways to engage undergraduate students in the use understanding evaluation and creation of open

access resources Issues that are of concern to graduate students are also given some attention and central to these are the development of Electronic Thesis and Dissertation ETD programs A chapter examines the library's role in balancing greater access to graduate student work with the consequences of openness such as concerns about book contracts and sales plagiarism and changes in scholarly research and production The book concludes with issues surrounding open data and library services in critical data librarianship including advocacy preservation and instruction It is hoped that this volume and the series in general will be a valuable and exciting addition to the discussions and planning surrounding the future directions services and careers in the 21st century academic library

Laser Information Age, *Unlocking the Gates* Taylor Walsh, 2010-12-28 How elite universities are entering the world of online education Over the past decade a small revolution has taken place at some of the world's leading universities as they have started to provide free access to undergraduate course materials including syllabi assignments and lectures to anyone with an Internet connection Yale offers high quality audio and video recordings of a careful selection of popular lectures MIT supplies digital materials for nearly all of its courses Carnegie Mellon boasts a purpose built interactive learning environment and some of the most selective universities in India have created a vast body of online content in order to reach more of the country's exploding student population Although they don't offer online credit or degrees efforts like these are beginning to open up elite institutions and may foreshadow significant changes in the way all universities approach teaching and learning *Unlocking the Gates* is one of the first books to examine this important development Drawing on a wide range of sources including extensive interviews with university leaders Taylor Walsh traces the evolution of these online courseware projects and considers the impact they may have both inside elite universities and beyond As economic constraints and concerns over access demand more efficient and creative teaching models these early initiatives may lead to more substantial innovations in how education is delivered and consumed even at the best institutions *Unlocking the Gates* tells an important story about this form of online learning and what it might mean for the future of higher education

A University for the 21st Century 20 Years Later James J. Duderstadt, 2017 University presidents are expected to draw upon their experiences to draft a book suggesting possible futures for higher education Since my term of office ended in 1996 as the new century approached it was natural to label this assignment as *A University for the 21st Century* a book that was awarded the Alice Beeman Award of CASE the Council on Advancement and Support of Education in 2001 Although this effort was heavily influenced by my experience in serving the University of Michigan as dean provost and president during the 1980s and 1990s I attempted to paint a broader picture of American higher education writ large Of course universities have a remarkable constancy in roles such as teaching and scholarship in organizations such as schools colleges and departments and in cultures such as academic freedom and tenure Indeed as Clark Kerr has noted in his famous quote

Aircraft Dynamics Marcello R. Napolitano, 2012-04-13 The 1st edition of *Aircraft Dynamics from Modeling to Simulation* by Marcello R Napolitano is an innovative textbook with specific

features for assisting motivating and engaging aeronautical aerospace engineering students in the challenging task of understanding the basic principles of aircraft dynamics and the necessary skills for the modeling of the aerodynamic and thrust forces and moments. Additionally, the textbook provides a detailed introduction to the development of simple but very effective simulation environments for today's demanding students as well as professionals. The book contains an abundance of real-life students' sample problems and problems along with very useful Matlab codes.

National Strategies for E-learning in Post-secondary Education and Training Jaap Scheerens, Steven J. Hite, Tony Bates, 2000 *U.S. News & World Report*, 2007 **National Strategies for E-learning in Post-secondary Education and Training** Tony Bates, International Institute for Educational Planning, 2001. This book argues that e-learning technologies such as internet are bringing about an important shift within the education sector and are changing the very nature of learning. However, e-learning is not a cheap alternative to face-to-face teaching and its financing raises many questions for policy makers. Using examples drawn from countries that have invested most heavily in e-learning, the study considers the different policy options available and concludes that in today's globalised economy, although e-learning may not be the answer to some of the most pressing problems in developing countries, governments cannot afford to avoid the issue of e-learning altogether.

The Journal of Economic Perspectives, 2004. This journal attempts to fill a gap between the general interest press and other academic economics journals. Its articles relate to active lines of economics research: economic analysis of public policy issues, state-of-the-art economic thinking, and directions for future research. It also aims to provide material for classroom use and to address issues relating to the economics profession.
