

Operations Management (Heizer, Render, Munson) - Operations and Productivity - Exercise 1.15

Type	Exercise solution
Tags	Operations Management
Reference	Operations Management: Sustainability and Supply Chain
Status	Done
Language,-s	English

In December, General Motors produced 6,600 customized vans at its plant in Detroit. The labor productivity at this plant is known to have been 0.10 vans per labor-hour during that month. 300 laborers were employed at the plant that month.

a) How many hours did the average laborer work that month?

Output	6,600
Productivity per labor-hour	0.10
Laborers	300

1. How many hours did the average laborer work that month?

1. The number of hours worked by the average laborer can be calculated by dividing the total output by the labor productivity and then dividing the result by the number of laborers.

$$\frac{6,600 \text{ vans}}{0.10 \text{ vans per labor-hour}} = 66,000 \text{ labor-hours}$$
$$\frac{66,000 \text{ labor-hours}}{300 \text{ laborers}} = 220 \text{ hours per laborer}$$
