Risks come in many varieties and there is a growing concern for organizations to respond to the challenge. Businesses can be severely impacted by natural and man-made disasters including floods, earthquakes, tsunamis, environmental threats, terrorism, supply chain risks, pandemics, and white-collar crime. An organization's resilience is dependent not only on their own system security and infrastructure but also on the wider infrastructure providing health and safety, utilities, transportation, and communication. The growing body of knowledge in research and methodologies is a basis for decisions to safeguard people and assets and to ensure the survivability of an organization from a crisis. Not only can businesses become more secure through risk management but an effective program can also facilitate innovation and afford new opportunities.
