Conner, 2026-03-25 What is the essence of life Human experience can be viewed as a series of choices purposive activities and emotional states Even our most trivial actions are prompted by some goal Our experience also includes emotions joy sadness pleasure anxiety and so on Even boredom is a type of emotion But what is the meaning of all this Those who know anything about science are likely familiar with the idea that reality is based ultimately on particles and physical forces Modern scientific worldviews seem to offer no explanation for decisions goals feelings and meanings This book argues against the materialistic mechanistic reductionistic response to science Physics itself especially special relativity and quantum mechanics can be interpreted in ways that support rather than negate humanity's experience of choices values and meanings The process philosophy of Alfred North Whitehead and others is introduced as a useful tool However Whitehead's thought is presented not as a preexisting philosophy that is imported to the interpretation of science but as a set of ideas that Whitehead derived from his own knowledge of relativity and quantum theory The book's final two chapters offer ideas about religion that are compatible with the worldview that has been described *Instructor's Manual to Accompany Conceptual Physics* Paul G.
