**Mathematical Foundations of Computer Science**, 2005      **Formal Techniques for Networked and Distributed Systems - FORTE 2006** Elie Najm, Jean-Francois Pradat-Peyre, Véronique Viguié Donzeau-Gouge, 2006-09-27 This book constitutes the refereed proceedings of the 26th IFIP WG 6.1 International Conference on Formal Techniques for Networked and Distributed Systems FORTE 2006 held in Paris France in September 2006. The 26 revised full papers and 4 short papers presented together with 3 invited lectures were carefully reviewed and selected from 177 submissions. The papers focus on the construction of middleware and services using formalised and verified approaches.

*Analysis and Numerics of Partial Differential Equations* Franco Brezzi, Piero Colli Franzone, Ugo Pietro Gianazza, Gianni Gilardi, 2012-12-22 This volume is a selection of contributions offered by friends collaborators past students in memory of Enrico Magenes. The first part gives a wide historical perspective of Magenes work in his 50 year mathematical career the second part contains original research papers and shows how ideas methods and techniques introduced by Magenes and his collaborators still have an impact on the current research in Mathematics.

*Service-Oriented Computing - ICSOC 2005* Boualem Benatallah, Fabio Casati, Paolo Traverso, 2005-11-29 This volume contains the proceedings of the Third International Conference on Service Oriented Computing ICSOC 2005 that took place in Amsterdam The Netherlands December 12-15 2005. The 2005 edition had the important and ambitious goal of bringing together the different communities working in Web services and service oriented computing. By attracting excellent contributions from different scientific communities ICSOC aims at creating a scientific venue where participants can share ideas and compare their approaches to tackling the many still open common research challenges. The commitment to cross area fertilization was put into practice by having a very diversified Program Committee and by the presence of several area coordinators leaders in the respective communities who encouraged and supervised submissions in each area. This is also the first edition to feature a successful workshop and demo program with selected demos also presented in a paper like fashion so that they get the attention they deserve. In addition ICSOC 2005 inherited from previous editions a strong industrial presence both in the conference organization and in the program. This is very important due to the industrial relevance and the many challenges of service oriented technologies.

*Mathematical Reviews*, 2003      **Reviews in Number Theory, 1984-96**, 1997 These six volumes include approximately 20 000 reviews of items in number theory that appeared in *Mathematical Reviews* between 1984 and 1996. This is the third such set of volumes in number theory. The first was edited by W J LeVeque and included reviews from 1940-1972 the second was edited by R K Guy and appeared in 1984.
