Joshi,2023-09-25 This book proposes new technologies and discusses future solutions for ICT design infrastructures as reflected in high quality papers presented at the 8th International Conference on ICT for Sustainable Development ICT4SD 2023 held in Goa India on August 3 4 2023 The book covers the topics such as big data and data mining data fusion IoT programming toolkits and frameworks green communication systems and network use of ICT in smart cities sensor networks and embedded system network and information security wireless and optical networks security trust and privacy routing and control protocols cognitive radio and networks and natural language processing Bringing together experts from different countries the book explores a range of central issues from an international perspective *Cloud Computing Technologies for Green Enterprises* Munir, Kashif,2017-09-13 Emerging developments in cloud computing have created novel opportunities and applications for businesses These innovations not only have organizational benefits but can be advantageous for green enterprises as well Cloud Computing Technologies for Green Enterprises is a pivotal reference source for the latest scholarly research on the advancements benefits and challenges of cloud computing for green enterprise endeavors Highlighting pertinent topics such as resource allocation energy efficiency and mobile computing this book is a premier resource for academics researchers students professionals and managers interested in novel trends in cloud computing applications Recent Trends and Best Practices in Industry 4.0 Abhinav Sharma,Arpit Jain,Paawan

Sharma,Mohendra Roy,2023-11-03 Industry 4 0 is used interchangeably with the fourth industrial revolution and represents a new stage in the organization asnd control of the industrial value chain Cyber physical systems form the basis of industry 4 0 e g smart machines They use modern control systems have embedded software systems can be addressed via IoT the Internet of Things and may use extensive data analytics and or artificial intelligence systems to operate autonomously The aim of this book is to provide detailed insights into the state of art techniques in AI IoT Blockchain technology and associated technologies which play a vital role in the implementation of a successful project for upcoming and practicing engineers Owing to its multidisciplinary nature Industry 4 0 is not a single topic but a combination of a multitude of technologies from different domains Keeping this in mind the book includes the following topics Artificial intelligence Internet of things Blockchain technology Digital manufacturing Robotics Cybersecurity The book will be a comprehensive guide to

academicians and engineers who want to align with recent trends of fourth industrial revolution *ICDSMLA 2019* Amit Kumar, Marcin Paprzycki, Vinit Kumar Gunjan, 2020-05-19 This book gathers selected high impact articles from the 1st International Conference on Data Science Machine Learning Applications 2019 It highlights the latest developments in the areas of Artificial Intelligence Machine Learning Soft Computing Human Computer Interaction and various data science machine learning applications It brings together scientists and researchers from different universities and industries around the world to showcase a broad range of perspectives practices and technical expertise *Data Science and Data Analytics* Amit Kumar Tyagi, 2021-09-22 Data science is a multi disciplinary field that uses scientific methods processes algorithms and systems to extract knowledge and insights from structured labeled and unstructured unlabeled data It is the future of Artificial Intelligence AI and a necessity of the future to make things easier and more productive In simple terms data science is the discovery of data or uncovering hidden patterns such as complex behaviors trends and inferences from data Moreover Big Data analytics data analytics are the analysis mechanisms used in data science by data scientists Several tools such as Hadoop R etc are used to analyze this large amount of data to predict valuable information and for decision making Note that structured data can be easily analyzed by efficient available business intelligence tools while most of the data 80% of data by 2020 is in an unstructured form that requires advanced analytics tools But while analyzing this data we face several concerns such as complexity scalability privacy leaks and trust issues Data science helps us to extract meaningful information or insights from unstructured or complex or large amounts of data available or stored virtually in the cloud *Data Science and Data Analytics Opportunities and Challenges* covers all possible areas applications with arising serious concerns and challenges in this emerging field in detail with a comparative analysis taxonomy FEATURES Gives the concept of data science tools and algorithms that exist for many useful applications Provides many challenges and opportunities in data science and data analytics that help researchers to identify research gaps or problems Identifies many areas and uses of data science in the smart era Applies data science to agriculture healthcare graph mining education security etc Academicians data scientists and stockbrokers from industry business will find this book useful for designing optimal strategies to enhance their firm s productivity **Indian Journal of Engineering and Materials Sciences**, 2004 *IoT, Big Data and AI for Improving Quality of Everyday Life: Present and Future Challenges* Pradeep Kumar Singh, Sławomir T. Wierzchoń, Wiesław Pawłowski, Arpan Kumar Kar, Yugal Kumar, 2023-08-23 This book focuses mainly on the usages of three key technologies IoT big data and AI for various day to day applications Further it explores the possibilities of future research based on the usages of latest information systems This book explores the current research and challenges to be faced by different researchers for building intelligent information solutions using key technologies IoT big data and AI in improving quality of lives in smart cities and explores the limitations and capabilities of these three key computing technologies The book is organized into three major parts each part includes chapters exploring a specific topic and there are PART 1 IoT for Real World Solutions ii

Part 2 Big Data And Cloud Computing for Innovative Solutions For Day to Day Lives and iii Part 3 Artificial Intelligence for Everyday Lives This book may be useful to the scientists scholars and researchers who are working in the field of computer science and engineering and communication engineering along with the students in these subjects who are working or willing to work on IoT big data and AI technologies for improving quality of everyday life Specialists as well as student readers find the book chapters encouraging and helpful IoT data science cloud and AI all are the undergraduate UG bachelor subjects Use of these three key technologies for building new applications for better world is helpful for UG and postgraduate PG MS Programmes students as an elective and core course This book may also be very useful for the Ph D research scholars during their course work and may be used as an instrument to identify the different challenges associated with information systems

Artificial Intelligence: Practical Approach Syed Muzamil Basha, Syed Thouheed Ahmed, Santhosh Kumar M Naidu, 2022-03-14 The book introduces programming concepts through Python language The simple syntax of Python makes it an ideal choice for learning programming Because of the availability of extensive standard libraries and third party support it is rapidly evolving as the preferred programming language among the application developers It will bolster your foundational skills in Artificial Intelligence Make the most of our Expert Mentor ship facility and gain a practical understanding of Artificial Intelligence and Machine Learning Make the most of our real world projects from diverse industries The content in this book goes a long way towards helping you unlock lucrative career opportunities in the coveted fields of Artificial Intelligence and Machine Learning The steps in creating computers that are as fluent in human language as people has long been a goal for scientists and the general public Human language communication both represents and challenges an intelligence because while languages appear to follow some unseen rules of spelling and grammar Systems that understand or use language which we call Natural Language Processing NLP systems have been created by specifying algorithms for computers based on the observable regularities of language noted by experts Use this book to learn the principles and methods of NLP to understand what it is where it is useful how to use it and how it might be used people The book includes the core topics of modern NLP including an overview of the syntax and semantics of English benchmark tasks for computational language modeling and higher level tasks and applications that analyze or generate language using both rule based search and machine learning approaches It takes the perspective of a computer scientist The primary themes are abstraction data algorithms applications and impacts It also includes some history and trends that are important for understanding why things have been done in a certain way
