COURSE OVERVIEW

CPTEngineer's foundation is built firmly upon proven, hands-on, Penetration Testing methodologies utilized by our international group of vulnerability consultants. Mile2 trainers keep abreast of their field by practicing what they teach. They believe that, during training, an equal emphasis should be placed on both theoretical and real world experience if the student is going to succeed in mastering the necessary skills to become a CPTEngineer..

The CPTEngineer presents information based on the 5 Key Elements of Pen Testing: Information Gathering, Scanning, Enumeration, Exploitation and Reporting. System vulnerabilities will be discovered using these tried and true steps alongside the use of the latest hacking techniques.

This course also enhances the business skills needed by today's students. It will enable them to identify protection opportunities, justify testing activities, and optimize security controls needed by businesses attempting to reduce risks.

mile2 goes far beyond simply teaching students to "Hack". Mere hacking was the norm for classes that were available before mile2's introduced a new methodology in teaching this advanced skill.
