

## Module 1 – Drawing Set Organization

### 1.1 SHEET IDENTIFICATION

The sheet identification format typically used in traditional construction drawing sets uses a consistent set of sheet numbers, including drawing, and different sheet numbers to identify and organize sheets. These techniques have also provided an opportunity to expand the use of the sheet identifier. Accordingly, the sheet identification format is a key part of V5.0.

#### 1.1.1 Standard Sheet Identification

The sheet identification format is applicable to both manual and CAD drawings. It is consistent with standards set forth throughout the entire range of project types. The V5.0 sheet identification format standard uses consistent sheet numbering as follows:

- 1. The **drawing designer** – consisting of one alphabetical character and a hyphen or two alphabetical characters.
- 2. The **sheet type identifier** – consisting of one numerical character.
- 3. The **sheet sequence number** – consisting of two numerical characters.

The use of the drawing designer identifier identifies the sheet as a member of a project. A sheet type identifier identifies the type information on the sheet is followed by the sheet sequence number.

Regarding the use of sheet sequence numbers, V5.0 allows two levels of sheet identification. Below is a list of a combination of the sheet numbers used to set the context of the presentation of the drawings. Level 1 offers the simplest presentation format and would be suitable for all but the most complex projects. Level 2 provides guidance for complex or special types of projects. Refer to [V5.0 Appendix A – Drawing Designer, V5.0 Appendix B – Drawing Designer, V5.0 Appendix C – Drawing Designer](#) for more details on sheet numbering.

Note that the hyphen in the Level 1 drawing designer ID is located after the first of the characters of the second character. The hyphen is preferred rather than an electrical zero due to the use of the “0” character. The hyphen, “-”, is recommended for use to replace the hyphen when specifying operating system sheet set sheet numbers in the name.

#### 1.1.2 Drawing Designer

The first component of the sheet identification format, the drawing designer, is based on the numbering system of architectural drawing designers, using either a single alphabetical character and a hyphen or two to an alphabetical character (Level 1).

The drawing designer format allows the category of project to be contained in the first or in the first two characters. It must appear:

#### Sheet ID Name Format

A - B - C - D - E

#### Drawing Designer

A - B - C - D - E

#### Sheet Type Identifier

A - B - C - D - E

#### Sheet Sequence Number

- A - B - C - D - E
