Building the Future Ulrich Pfammatter, 2008 How have innovations in architecture and engineering come about? Who tested new approaches and when were important discoveries and experiments accepted? This book illuminates the history and development of building in all its constructive technical and cultural aspects from the Industrial Revolution to the present and into the future. One hundred case scenarios articulate how new ideas, their context and ideology became integral parts of the built environment. It also discusses which technical and creative mediums the pioneers and protagonists of the various trends and schools of thought used to articulate their ideas. The insightful texts and numerous images make this volume an essential handbook of architectural and structural history for students and professionals. **BOOK JACKET** Space Structures Subramanian Narayanan, 2006 Space Structures are economical and aesthetically pleasing in appearance. They provide a unique solution for covering large column-free areas. This book gives a state-of-the-art presentation of the analysis, design, and construction of space structures. The author synthesizes data currently available with his original and exhaustive research to produce the definitive book on space structures. Principal features and topics of the book include: Analysis, design, and construction of various types of space structures; Nodes and jointing systems; Approximate methods of analysis. Concepts are explained through **The Consulting Engineer** , 1968 *Spatial Structures: Heritage, Present and Future* Gian Carlo Giuliani, 1995 **Bulletin of the International Association for Shell and Spatial Structures** International Association for Shell and Spatial Structures, 1986
