International Asia Conference on Industrial Engineering and Management Innovation (IEMI2012) Proceedings Ershi Qi,Jiang Shen,Runliang Dou,2013-05-29 The International Conference on Industrial Engineering and Engineering Management is sponsored by the Chinese Industrial Engineering Institution CMES which is the only national level academic society for Industrial Engineering The conference is held annually as the major event in this arena Being the largest and the most authoritative international academic conference held in China it provides an academic platform for experts and entrepreneurs in the areas of international industrial engineering and management to exchange their research findings Many experts in various fields from China and around the world gather together at the conference to review exchange summarize and promote their achievements in the fields of industrial engineering and engineering

management For example some experts pay special attention to the current state of the application of related techniques in China as well as their future prospects such as green product design quality control and management supply chain and logistics management to address the need for amongst other things low carbon energy saving and emission reduction They also offer opinions on the outlook for the development of related techniques The proceedings offers impressive methods and concrete applications for experts from colleges and universities research institutions and enterprises who are engaged in theoretical research into industrial engineering and engineering management and its applications As all the papers are of great value from both an academic and a practical point of view they also provide research data for international scholars who are investigating Chinese style enterprises and engineering management

Optimization Methods in Mathematical Modeling of Technological Processes Alena Vagaská, Miroslav Gombár, Anton Panda, 2023-07-20 This book focuses on selected methods of applied mathematics that are aimed at mathematical optimization with an emphasis on their application in engineering practice It delves into the current mathematical modeling of processes and systems with a specific focus on the optimization modeling of technological processes The authors discuss suitable linear convex and nonlinear optimization methods for solving problems in engineering practice Real world examples and data are used to numerically illustrate the implementation of these methods utilizing the popular MATLAB software system and its extension to convex optimization The book covers a wide range of topics including mathematical modeling linear programming convex programming and nonlinear programming all with an engineering optimization perspective It serves as a comprehensive guide for engineers researchers and students interested in the practical application of optimization methods in engineering
