Reliability-centred Maintenance John Moubray, 1997 Reliability centred Maintenance is a process used to determine systematically and scientifically what must be done to ensure that physical assets continue to do what their users want them to do Widely recognised by maintenance professionals as the most cost effective way to develop world class maintenance strategies RCM leads to rapid sustained and substantial improvements in plant availability and reliability product quality safety and environmental integrity The author and his associates have helped users to apply RCM and its more modern derivative RCM2 on more than 600 sites in 32 countries These sites include all types of manufacturing especially automobile steel paper petrochemical pharmaceutical and food manufacturing utilities water gas and electricity armed forces building services mining telecommunications and transport This book summarises this experience in the form of an authoritative and completely practical description of what RCM2 is and how it should be applied The second edition has been comprehensively revised to incorporate the most recent developments in this field It includes more than 100 pages of

new material on condition monitoring the analysis of functions and failures human error the management of risk failure finding and the measurement of maintenance performance This book will be of immense value to maintenance managers and to anyone else concerned with the reliability productivity safety and environmental integrity of physical assets Its straightforward plant based approach makes the book especially well suited to use in centres of higher education John Moubray BSc Mech Eng spent his early career developing and implementing maintenance management systems first as a plant engineer then as a consultant In the early 1980s he began to focus on the industrial application of RCM under the guidance of the late F Stanley Nowlan In 1986 he set up Aladon Ltd a consulting and training company based in Lutterworth UK He is currently managing director of Aladon which specialises exclusively in the development of reliability centre management processes and their application to physical assets *Reliability-centered Maintenance* F.
