Introducing Econometrics William Stanley Brown, 1991

The Measurement of Productive Efficiency and Productivity Growth Harold O. Fried, C. A. Knox Lovell, Shelton S. Schmidt, 2008-02-04 This book is an accessible update to the widely hailed collection by the current editors The Measurement of Productive Efficiency Techniques and Applications OUP 1993 Over ten years of the most recent research in the changing field of efficiency and productivity analysis have been applied and the result will guide readers from the basic models to the latest cutting edge extensions

Reforming Local Government Joseph Drew, 2020-06-23 This book is a bold prescription for local government reform that moves well beyond the old arguments regarding consolidations also referred to as amalgamations and co operation sometimes referred to as shared services to paint a picture of an efficient effective tier of government that strikes a balance between the right of persons to pursue their existential ends and the need to promote the common good The book presents a system of local government that balances human dignity with the common good restrains Leviathan provides a voice for the disenfranchised and even the disinterested and delivers goods and services efficiently and effectively Ironically what is often argued to be the weakness of local government in many jurisdictions the fact that it is merely a creature of statute is also the best hope we have of making the oft cited rhetoric about how local government is the closest to the people that serves the people best become reality

Contested Architectural Pasts and Futures of a Regional City, Geelong, Australia Mirjana Lozanovska, Ursula de Jong, 2024-10-03 This collection of essays highlights current debates for cities undergoing urban renewal focussing on regional cities as places that lead change Like many regional cities Geelong is grappling with the legacy of its industrial architectural heritage and identity This in depth study of the city of Geelong examines theories and realities from the speculative to the mundane critical to change prompted by deindustrialisation While this book argues that architecture and the built environment are key to urban renewal an intersectional perspective on Geelong as a place raises contested pasts and territories This brings attention to the dispossession of First Nations people by British colonisers as well as the exploitation of immigrant communities in industrial

production Informed by positions on design futures decolonising and cultural urbanisms adaptive re use and the post industrial city the chapters in this book expand an interdisciplinary field relevant to scholars and practitioners in heritage and conservation urban design community engagement and place making more generally *Econometric Foundations Pack with CD-ROM* Ron Mittelhammer (Prof.), George G. Judge, Douglas J. Miller, 2000-07-28 The text and accompanying CD ROM develop step by step a modern approach to econometric problems They are aimed at talented upper level undergraduates graduate students and professionals wishing to acquaint themselves with the principles and procedures for information processing and recovery from samples of economic data The text fully provides an operational understanding of a rich set of estimation and inference tools including traditional likelihood based and non traditional non likelihood based procedures that can be used in conjunction with the computer to address economic problems **Principles of Neural Model**

Identification, Selection and Adequacy Achilleas Zapranis, Apostolos-Paul N. Refenes, 2012-12-06 Neural networks have had considerable success in a variety of disciplines including engineering control and financial modelling However a major weakness is the lack of established procedures for testing mis specified models and the statistical significance of the various parameters which have been estimated This is particularly important in the majority of financial applications where the data generating processes are dominantly stochastic and only partially deterministic Based on the latest most significant developments in estimation theory model selection and the theory of mis specified models this volume develops neural networks into an advanced financial econometrics tool for non parametric modelling It provides the theoretical framework required and displays the efficient use of neural networks for modelling complex financial phenomena Unlike most other books in this area this one treats neural networks as statistical devices for non linear non parametric regression analysis
