Balogh, 2008 String theory is a model of fundamental physics whose building blocks are one dimensional extended objects called strings rather than the zero dimensional point particles that form the basis for the standard model of particle physics The phrase is often used as shorthand for Superstring theory as well as related theories such as M theory By replacing the point like particles with strings an apparently consistent quantum theory of gravity emerges Moreover it may be possible to unify the known natural forces gravitational electromagnetic weak nuclear and strong nuclear by describing them with the same set of equations Studies of string theory have revealed that it predicts higher dimensional objects called branes String theory strongly suggests the existence of ten or eleven in M theory space time dimensions as opposed to the usual four three spatial and one temporal used in relativity theory **A First Course in String Theory** Barton Zwiebach, 2009-01-22 String theory made understandable Barton Zwiebach is once again faithful to his goal of making string theory accessible to undergraduates He presents the main concepts of string theory in a concrete and physical way to develop intuition before formalism often through simplified and illustrative examples Complete and thorough in its coverage this new edition now includes AdS CFT correspondence and introduces superstrings It is perfectly suited to introductory courses in string theory for students with a background in mathematics and physics New sections cover strings on orbifolds cosmic strings moduli stabilization and the string theory landscape Now with almost 300 problems and exercises with password protected solutions for instructors at www.cambridge.org/zwiebach **Advances in Theoretical and Mathematical Physics**, 2006 Tenth Marcel Grossmann Meeting, The: On Recent Developments In Theoretical & Experimental General Relativity, Gravitation, & Relativistic Field Theories (In 3 Vols) - Procs Of The Mgio Meeting Held At Brazilian Ctr For Res In Phys (Cbpf) Mario Novello, Santiago Perez Bergliaffa, Remo Ruffini, 2006-02-17 The

Particles and Fields: Sixth Mexican Workshop Juan C. D'Olivo, Marti Ruiz-Altaba, Luis V.
