1. The story is an account of real events
2. The story hinges on a particular historical event

4. The places mentioned in the story are all imaginary
5. The story tries to relate history to science

1. False
2. True
3. False
4. False
5. True

II:

Briefly explain the following statements from the text.

Question 1:

"You neither travelled to the past nor the future. You were in the present experiencing a different world."

Answer 1:

This statement is made by Rajendra Deshpande to Professor Gangadharant Gaitonde. He explains to Prof Gaitonde's special experience in the two days following his clash with a truck. As per him, professor did not travel in time. In fact, he was in the present but was experiencing a different world. Because he was in a dream like state after medical trauma; he was alive but not conscious.

Question 2:

"You have passed through a fantastic experience; or more correctly, a catastrophic experience."

Answer 2:

Rajendra Deshpande through this statement is trying to say that Professor Gaitonde's experience was one of the most phenomenal experiences by making a transition to a different world. In fact he calls it a catastrophic experience. Now, this word is a reference to Catastrophe Theory which is a branch of mathematics and is concerned with unexpected changes. Professor Gaitonde's experience of travelling to a parallel world without moving back or forth in time is the best example of a catastrophic experience.

Question 3:

Gangadharant could not help comparing the country he knew with what he was witnessing around him.

Answer 3:

Professor Gaitonde experienced in his unconsciousness about his country was different to the reality. He saw that India has not allowed the British rule to last and the shadow of the chains of slavery has not fallen on its country.

Question 4:

"The lack of determinism in quantum theory."

Answer 4:

Professor Gaitonde said these lines while talking to Rajendra Deshpande. He feels that he is amateur in science still he knows the lack of determinism in quantum theory. Rajendra on the other hand shares the example of electrons orbiting the nucleus of an atom. There is no certainty of an electron's presence in a particular state.
