Collins Bird Guide Stuart Keith, John Gooders, 1980 Bird watching is enjoying an ever increasing popularity That

appreciation is often accompanied by a desire to know more about them this book is designed to satisfy that wish and incidentally to be in itself a treasury of bird photographs This guide covers all of Europe including that part of Russia west of the 30th meridian Iceland is included as well as the larger Mediterranean islands and the part of Turkey lying west of the Bosphorus 464 bird species are fully described and illustrated in this guide As a rule we have included a species if it has occurred in Europe more than thirty times Because the illustrations in conventional bird guides are organised by families and scattered throughout the text the reader must leaf through the entire book to find the picture of a particular bird Instead we have placed all the colour plates in one section and then grouped the family and species descriptions in a separate section The unified visual key arranges birds by characteristics they have in common such as shape and colour Simple silhouette symbols direct the reader to the group of birds most resembling the one he has sighted He can then narrow his search to a few birds or find exactly the one he has seen Reading the species descriptions will confirm the identification For our illustrations we have used colour photographs of birds in their natural habitats Besides being a pleasure to look at these photographs show birds as they really are in nature rather than an artist's interpretation For the first time colour photographs of almost every European bird appear in one volume bringing together the work of over 100 outstanding bird photographers in a total of 613 photographs

Birdscapes Jeremy Mynott, 2009 What draws us to the beauty of a peacock the flight of an eagle or the song of a nightingale Why are birds so significant in our lives and our sense of the world And what do our ways of thinking about and experiencing birds tell us about ourselves Birdscapes is a unique meditation on the variety of human responses to birds from antiquity to today and from casual observers to the globe trotting twitchers who sometimes risk life limb and marriages simply to add new species to their life lists Drawing extensively on literature history philosophy and science Jeremy Mynott puts his own experiences as a birdwatcher in a rich cultural context His sources range from the familiar Thoreau Keats Darwin and Audubon to the unexpected Benjamin Franklin Giacomo Puccini Oscar Wilde and Monty Python Just as unusual are the extensive illustrations which explore our perceptions and representations of birds through images such as national emblems women's hats professional sports logos and a Christmas biscuit tin as well as classics of bird art Each chapter takes up a new theme from rarity beauty and sound to conservation naming and symbolism and is set in a new place as Mynott travels from his home patch in Suffolk England to his away patch in New York City's Central Park as well as to Russia Australia and Greece Conversational playful and witty Birdscapes gently leads us to reflect on large questions about our relation to birds and the natural world It encourages birders to see their pursuits in a broader human context and it shows nonbirders what they may be missing
